## POWER CUBE 6000

|                          |                                     |
|--------------------------|-------------------------------------|
| Output voltage/current:  | Lightning :5V/1A ,Apple Watch:5V/1A |
| Input voltage/current:   | 5V/1.5A (max)                       |
| Magnetic charging dock : | Support charging Apple Watch        |
| Battery:                 | Li-ion Polymer                      |
| Cycle charge times:      | 500 times                           |
| Standard Capacity:       | 6000mAh/3.63V/21.78Wh               |
| Charging Time:           | 4-5h                                |
| Operating Temperature:   | 0°C ~ 45°C                          |
| Dimensions:              | 42x22x112mm                         |
