How to use Google Home to voice control your EZCast?

Before you begin using Google Mini to voice control your EZCast devices, you have to register your devices to your EZCast account from the EZCast app. To do this, follow the steps below:
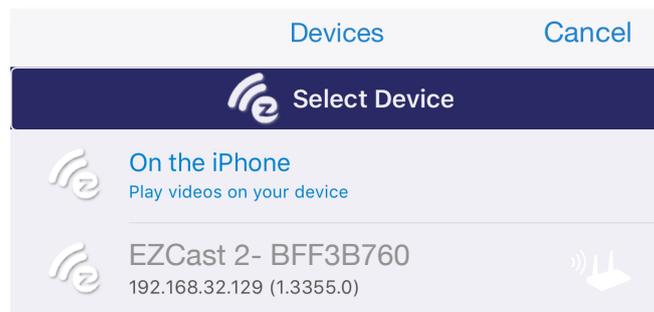

1. **Download EZCast App**
You need to register your EZCast device within the EZCast app, before using your voice to control it. Our EZCast app supports phones and tablets with:
   ○ Android 4.4 and above
   ○ iOS 9.0 and above

2. Select your EZCast device
Launch EZCast app and select your EZCast device (make sure your device is

connected to Wi-Fi Network).

3. After selecting your device, go to Settings (side bar)to change your device name to something easy to pronounce such as: Living Room, Bedroom, Office, Kitchen. Please reboot your dongle for the changes to take effect.
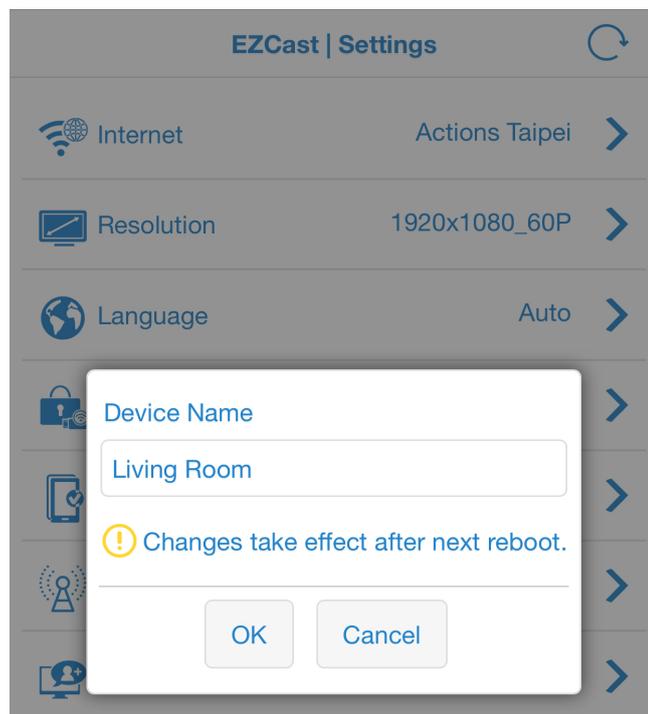

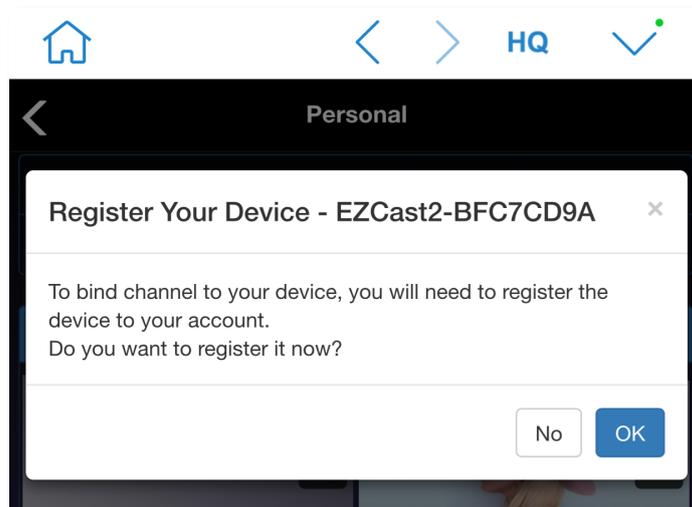

4. Sign in to EZChannel
After selecting your EZCast device, choose EZChannel with the EZCast app, and choose Personal > Sign in EZChannel.
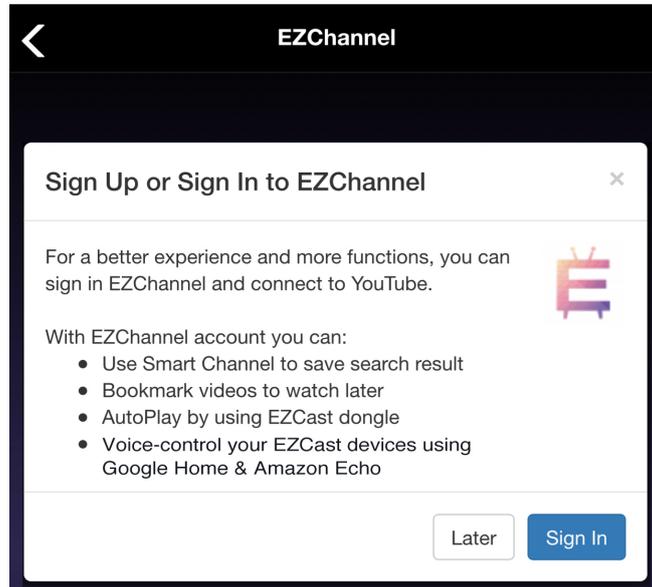

5. Register device
After signing in, click "OK" to register.

6. After registration, please proceed to your Google Home app to bind your EZCast device.

7. To link your EZCast with your Google home, you need to said " Hey Google, talk to EZCast."

7. Google will give you a voice feedback:"It looks like your EZCast account is not linked yet. You can link EZCast to your Google Account from the Google Home app". Launch your Google Home and "Link to EZCast" Tab will appear on your Google Home homepage.

8. Click "Link to EZCast", then you have to log into your EZCast account. Proper authorization is required to access this skill.
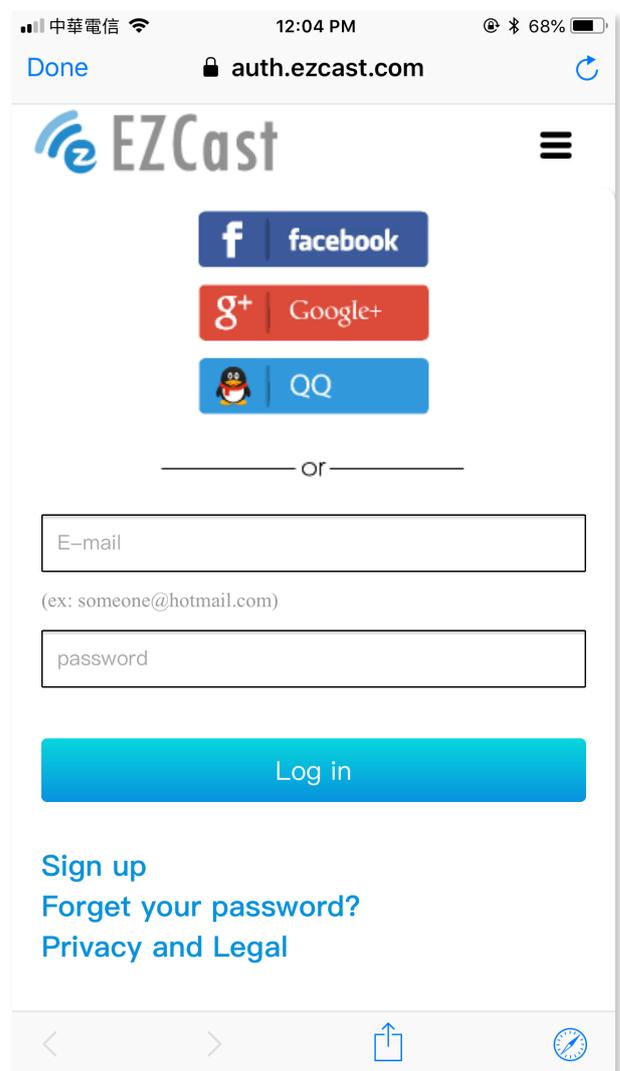

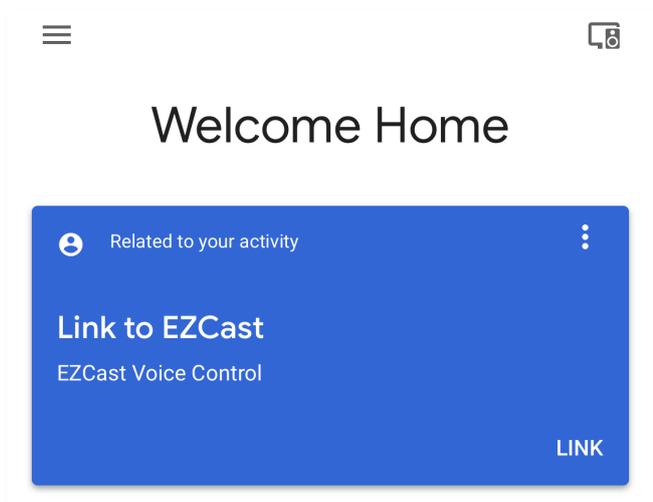

9. After authorization, choose your device and click "OK".
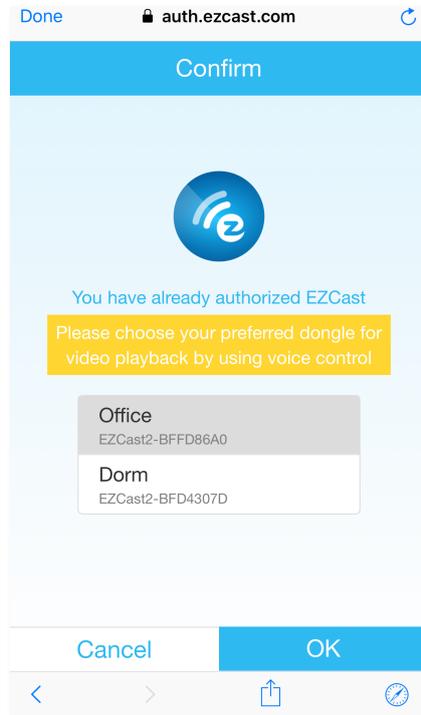

10. Your EZCast is ready ! Now you can voice command your EZCast device !

To control EZCast device using voice command on Google Home:

To control EZCast device using Google home, there are two options in the beginning.
Option 1: You can say " Hey Google, talk to EZCast" to wake up Google Home before you give an instruction.
 or you can also use
Option 2: " Hey Google, ask EZCast to {your instructions}"/ Hey Google, talk to EZCast to {your instructions}
"
