PC Software USB Driver Install Guide

Use the supplied USB cable to connect the oscilloscope with a PC through their USB ports.

Note: If you use a USB cable that is not supplied by us, some problems such as connection error and signal disturbing might occur.

Install Guide for Windows 10\Windows 8\Windows 7\Windows Vista

The Microsoft Windows Systems such as Windows 10\Windows 8\Windows 7\Windows Vista, change a lot, which require a new installation guide of USB driver. Here it is.

During the whole installation, please assure that the device is running well and plugged into PC from USB.

Right click [Computer], you can find it on the desktop, or in [Start] menu.

In the pop up menu, click [Manage] and it will open a window named "Computer Management", as follow, in the left side click [Device Manager], it will show a devices tree in the middle, and then click the last one button "Scan for hardware changes" in tool bar as follow, and if the device is running well and plugged into PC, computer will detect an unknown device with a "!" icon.

1

Right click the unknown device icon, in the pop up menu click [Update Driver Software...],

Other devices	
🛛 🦣 Oscilloscope	
Ports (COM & LI	Update Driver Software
Processors	Disable
Sound, video and	Uninstall
System devices	
🖟 🖟 Universal Serial E	Scan for hardware changes

In the open window, select [Browse my computer for driver software].

The next window, select a directory path for the driver software location "USBDRV\win10_win8_win7_vista", and click "Next".

			×
0	Update Driver Software - Oscilloscope		
	Browse for driver software on your cor	mputer	
	Search for driver software in this location:	7	
	F:\setup_directory\USBDRV\win10_win8_win7_vista	▼ B <u>r</u> owse	
	✓ Include subfolders		
	Let me pick from a list of device de This list will show installed driver software co software in the same category as the device.	rivers on my computer ompatible with the device, and all driver	
		Next Car	ncel

The system is installing driver software for you, as follow:

6	Update Driver Software - Oscilloscope	×
	Installing driver software	

And finish.

Now a successful installation window opens with information "Windows has successfully updated your driver software".

🕞 🛽 Update Driver Software - usb device	×
Windows has successfully updated your driver software	
Windows has finished installing the driver software for this device:	
usb device	
	Close

Close the window, have a look at the "Computer Management" window, you will find a device under [LibUSB-Win32 Devices], it should be like this:

3

Install Guide for Windows XP\Windows 2000

Notice: for both x86 and x64.

Plug into the running well device to open [Found New Hardware Wizard] dialog.

Or you can right click [My Computer] and select [Manage], in the left area of opened [Computer Management] select [Device Manager], double click the item [USB Device] with "?" in the middle area to open the Wizard,

4

In the Wizard, select [No, not this time],

Select "Install from a list or specific location(Advanced)".

Select [Search for the best driver in these locations.], then select [Include this location in the search] and indicate a directory location for USB driver which is named as "USBDRV\win_xp" and under the directory where you installed the program at,

und New Hardware Wizard	
Please choose your search and installation options.	
<u>⊙ S</u> earch	for the best driver in these locations.
Use thi paths a v v l v l v l v l v l v l v l v v l v v t s	 check boxes below to limit or expand the default search, which includes local nd removable media. The best driver found will be installed. iearch removable media (floppy, CD-ROM) nclude this location in the search: ': \setup_directory\USBDRV\win_xp Browse earch. I will choose the driver to install.
Choose the driv	this option to select the device driver from a list. Windows does not guarantee t er you choose will be the best match for your hardware.
	< <u>B</u> ack <u>N</u> ext > Cancel

Then the installation is running,

And complete,

And prompt as installed,

And show installed in [Device Management],

Now you can use the program and use if for USB communication.

If there is an early version of USB driver in your computer, you could try running "reinstall.bat" to fix, the file is under the directory of "USBDRV".
