

Description

The compact and flexible all-in-one solution REX consists of several perfectly matched components. It comprises the EM12-T supply module for the plus and minus potential via a single or double channel REX12-T electronic circuit protector which can be mounted side by side in any number and the PM12-T potential extension module for plus and minus multiplication. Connection of the only 12.5 mm wide modules is exclusively with push-in terminals which allow no-tool time-saving wiring.

The circuit protectors are placed on the symmetrical rail one after another in combination with EM12-T and PM12-T and are electrically connected by means of the built-in connector arm - no further accessories are required. The circuit protector REX12-T offers selective overcurrent protection by responding to short circuit or overload faster than the switch mode power supply. Capacitive loads of up to 20,000µF can be switched on without problems. The circuit protector is available in all standard fixed and adjustable current ratings from 1 A to 10 A. Besides the UL508listed approval and NEC Class2, the REX12-T also meets the requirements of cable protection to EN60204-1.

Features

- Combination of supply modules, overcurrent protection and power distribution
- Selective load protection by means of electronic trip curve
- No accessories required for connecting the components
- Width per channel only 12.5 mm (1-channel) or 6.25 mm (2-channel)
- Fixed and adjustable current ratings 1A-10A
- Integral fail-safe element, adjusted to max. current rating
- Switching capacitive loads up to 20,000 µF
- Manual ON/OFF/reset momentary switch
- Clear status indication by means of LED and signal contact Si
- Connection via push-in terminals including orange press release buttons

Benefits

- Saves cost – no further accessories required
- Saves 50 % time through innovative and flexible mounting and connection technology
- Saves space – with a width of only 12.5 mm per channel
- Provides flexibility through ease of mounting, disassembly and modular design
- Reduces storage costs because only one product is required for all current ratings

Enquire adjusted current rating with REX12D-TE2	<p>Enquiry of currently adjusted current rating, independent of the operating mode (COM or standard), possible for each channel directly on the REX12D-TE2</p> <p>Enquiry mode is started by pushing the button between ≥ 2 seconds and < 5 seconds. After releasing the button, the LED is RED for 333 ms to indicate start of enquiry. Afterwards, the LED flashes ORANGE in a pulse/break ratio of 1/2 with a frequency of 1 Hz to indicate the adjusted current value. When the adjusted current rating is reached, signalling re-starts after the RED LED re-lights for 333 ms. The enquiry mode is left after the adjusted current rating was signalled 5 times or by pressing the button. Visual indication will now show again the current operating condition.</p> <p>The enquiry mode is possible in all operating conditions (ON, OFF, UNDERVOLTAGE and TRIPPED).</p>
Adjustment of current rating with	<p>The adjustment mode directly on the REX12D-TE2 can only be activated in the REX12D-TE2 standard mode</p> <p>The adjustment mode is started per channel by pushing the button for ≥ 5 seconds. After releasing the button, the LED is RED for 333 ms to indicate start of adjustment. The LED is blinking GREEN with a pulse/break ratio of 1/4 at a frequency of 0.6 Hz for visual indication. After reaching the max. adjustment value, signalling re-starts. Overrun of the max. adjustment value after 1 Ampere is indicated by the RED LED (333 ms). The current rating to be adjusted is adopted by pushing the button during the blinking period of 1 A up to the max. adjustment value. If for instance the button is pushed after the 7th illumination of the GREEN LED, 7A is adopted as current rating and visual indication again shows the current operating condition. If the button is not pressed, the adjustment mode is left after 5 times signalling the current rating range without a new current rating being adopted and the visual indication returns to current status indication.</p> <p>The adjustment mode is possible in all operating conditions (ON, OFF, UNDERVOLTAGE and TRIPPED).</p>
Reset function	a blocked load output (blocked by overload / short circuit) can externally be reset by the ON/OFF momentary switch
Leakage current in load circuit in OFF condition	typically < 1 mA
Capacitive loads	up to 20,000 μ F: depending on: cable attenuation, power supply used, load current and current rating
Free-wheeling diode	external free-wheeling circuit at inductive load (rating according to load)
Parallel connection of several load outputs	not allowed

Temperature factor / continuous duty

The time/current characteristic depends on the ambient temperature. In order to determine the max. load current, please multiply the current rating with the temperature factor and consider the factor for side-by-side mounting.

Temperature factor table:

ambient temperature [°C]	0	10	23	40	50	60
temperature factor	1	1	1	0.95	0.90	0.85

Note:

When mounted side-by-side, the devices can carry max. 80 % of their rated load or a different rating has to be selected (see Technical Information on www.e-t-a.de/ti_d)

With high temperatures, the load current warning threshold “warn limit typically $0.9 \times I_N$ ” will be reduced in accordance with the temperature factor.

Selection of current rating of the circuit protector \leq rating of power supply.

Description – EM12-T supply module

The EM12-T supply module receives the DC 24 V supply voltage, e.g. from a switch mode power supply, and distributes it to the mounted circuit protectors via the integral connector arm of the REX12-T.

The potential-free auxiliary contact in the EM12-T indicates any detected failures through the circuit protector, e.g. to the superordinate control unit (CPU).

Mass	approx. 40 g
Approvals	UL 1059, File # E335289

Schematic diagram

EM12-T00-000-GND-40A

PM12-T03-00-GND-20A potential module – GND (10-way)

Technical data

Please observe general data of REX / EM / PM	
Operating voltage U_B	0 V – DC 24 V (0 ... 30 V)
Operating current I_B	max. load 20 A
line terminal	0 V – GND
Push-in terminal PT 2.5	0.14 mm ² ... 2.5 mm ² flexible AWG24 – AWG14 rigid
stripping length	8 mm ... 10 mm
Dimensions (w x h x d)	12.5 x 80 x 98 mm
Mass	approx. 52 g
Approvals	UL 1059, File # E335289

Accessories

EM12-T00-300-GND-40A supply module centre/right – 0V – GND

Technical data

Please observe general data of REX / EM / PM	
Operating voltage U_B	0 V – DC 24 V (0 ... 30 V)
Operating current I_B	max. load 40 A
line terminal	0 V – GND
Push-in terminal PT 10	0.5 mm ² ... 10 mm ² flexible AWG24 – AWG8 rigid
stripping length	18 mm
Dimensions (w x h x d)	12.5 x 80 x 98 mm
Mass	approx. 45 g
Approvals	UL 1059, File # E335289

Accessories

PM12-T01-00-LOAD-20A potential module – LOAD
(10-way, 1 x supply, 9 x LOAD)

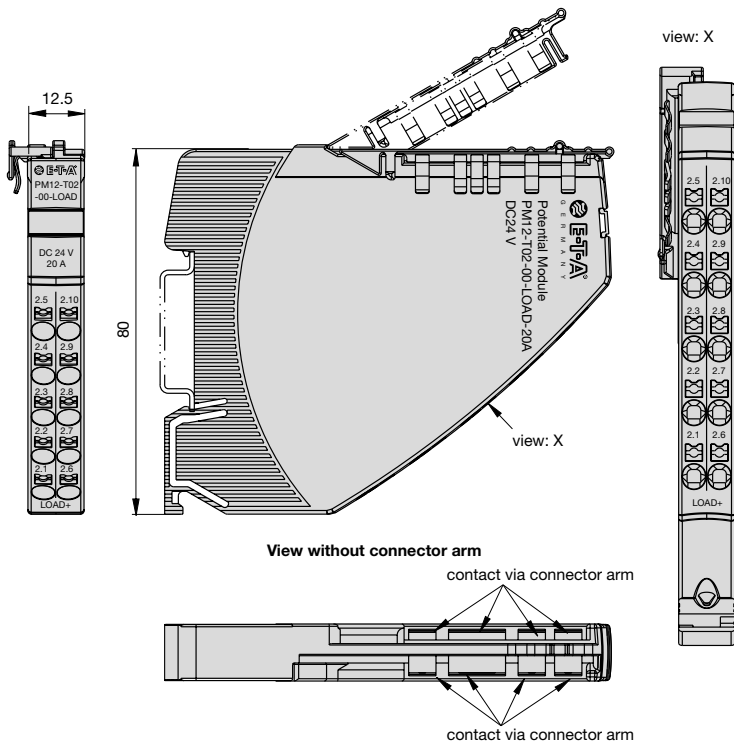

Technical data

Please observe general data of REX / EM / PM	
Operating voltage U_B	DC 24 V (18...30 V)
Operating current I_B	max. load 20 A
Insulation co-ordination	0.8 kV / pollution degree 2
Screw terminals	LOAD+
Push-in terminal PT 2.5	0.14 mm ² ... 2.5 mm ² flexible AWG24 – AWG14 rigid
stripping length	8 mm ... 10 mm
Dimensions (w x h x d)	12.5 x 80 x 98 mm
Mass	approx. 52 g
Approvals	UL 1059, File # E335289

Schematic diagram

PM12-T02-00-LOAD-20A potential module – LOAD
(2 x 5-way, 1 x supply and 4 x LOAD each)

Technical data

Please observe general data of REX / EM / PM	
Operating voltage U_B	DC 24 V (18...30 V)
Operating current I_B	max. load 20 A
Insulation co-ordination	0.8 kV / pollution degree 2
Screw terminals	LOAD+
Push-in terminal PT 2.5	0.14 mm ² ... 2.5 mm ² flexible AWG24 – AWG14 rigid

Accessories

EM12-T00-100-LINE-40A supply module centre/right – LINE, LINE connected

Technical data

Please observe general data of REX / EM / PM	
Operating voltage U_B	DC 24 V (18...30 V)
Operating current I_B	max. load 40 A
Insulation co-ordination	0.8 kV / pollution degree 2
Screw terminals LINE+1	
Push-in terminal PT 10	0.5 mm ² ... 10 mm ² flexible AWG24 – AWG8 rigid
stripping length	18 mm
Screw terminals 0 V	
push-in terminal PT 2.5	0.14mm ² ... 2.5mm ² , flexible AWG26 – AWG14 rigid
Stripping length	8 mm ... 10 mm
Dimensions (w x h x d)	12.5 x 80 x 98 mm
Mass	approx. 52 g
Approvals	UL 1059, File # E335289
