- choose language
- click on create account
- enter your e-mail address
- click register

GPS SERVICE

E-mail

Register

Login or recover password

Mobile version

English

- After a few minutes check your e-mail for login details .
- Enter your e-mail address and the received password (later you can change your password in the section settings) and click on login.

Username

Password

Login

Recover password or create account

Mobile version English

The login form consists of three main input fields: a grey box for the username with a person icon, a grey box for the password with a key icon and a toggle eye icon, and a blue button labeled "Login" with a lock icon. Below these is a link for "Recover password or create account". At the bottom, there are two options: "Mobile version" with a mobile phone icon and "English" with a dropdown arrow.

Workspace overview

After login you will be redirected to the main page. Main page allows to access most of common tracking features and setting, monitor object positions on map and get detailed information such as speed, coordinates, address, movement history and more.

2. Add new object

Press the button **Add** in the Left panel and in the window **Add object** enter the description and the IMEI number .

Important : the IMEI number must be entered correct. When the entered IMEI number is not correct, see the point 4.

The screenshot shows a dialog box titled "Add object" with a blue header and a close button. Below the header, there are two input fields: "Name" and "IMEI". The "Name" field is currently empty with a cursor. The "IMEI" field is also empty. At the bottom of the dialog, there are two buttons: "Save" (with a floppy disk icon) and "Cancel" (with an "X" icon).

Press the button **Save**.

A new object appears in the Left panel.

3. Tracking.

View a history of object (track)

Click on the icon **Object control** to select the period of object history.

Afterwards the history will be downloaded and shown on the map. On the bottom of the map will be indicated the speed of the object .

1. Top panel
2. User account panel
3. Map control

+ - map zoom control

-  **objects** enable / disable
-  **object labels** enable / disable
-  **markers** enable / disable
-  **routes** enable / disable
-  **zones** enable / disable
-  **clusters** enable / disable – useful feature for those who has a large number of objects and markers. It splits markers and objects into groups , which according to map zoom level will reveal content inside of it.
-  **fit objects on map**
-  **ruler**
-  **measure area**

4. Left panel
5. Object details panel

Top panel

Top panel is used to quickly access to frequently used tools (fit objects on the map, ruler, search of address...) and to sections (settings, reports and commands using to control of objects).

 **About** – allows to check the currently used version of software

 **Help** – you will get under the e-mail Address : kundenservice@conrad.de

-  **Settings** – settings menu, allows to add new objects, events etc.
-  **Dashboard** – useful for the fleet management only
-  **Show point** – focus the map on entered coordinates
-  **Search address** – helpful and easy to use tool for searching an address on the map
-  **Reports** – allows to create various reports
-  **Tasks** – useful for the fleet management only
-  **RFID and iButton log book** – useful for the fleet management only
-  **DTC** (Diagnostic Trouble Codes) – useful for the fleet management only
-  **Maintenance** – useful for the fleet management only
-  **Object control**
-  **Image gallery** - receives images with location of GPS devices
-  **Chat** – useful for the fleet management only

The icons appear only when an object is tracked.

-  **Route** enable/disable
-  **Snap (corrections of routes)** enable/disable
-  **Arrows (routes)** enable/disable
-  **Data points (changes of direction)** enable/disable
-  **Stops** enable/disable
-  **Events** enable/disable
-  **Hide** enable/disable (close icons)

Left panel

Panel with the list of objects allows to view available objects, find them on the map, view the route history of objects and edit object setting.

1. **Objects field** – review of current objects statistics
2. **Events field** –review of the events history (speed, entering or leaving of zones etc.)
3. **Place field-** allows to create , edit and delete zones and markers
4. **History field** – to view the history, create reports, export them to various formats etc.
5. **Search** – allows to find objects by their names
6. **Reload** – reloads objects list
7. **Add object** –allows to add a new object
8. **Visibility checkbox** –turns on or off the visibility of objects on the map
9. **Track objects** –centers the selected objects in the middle of the screen each time after the GPS device has refreshed its position. When multiple objects were selected, all of them are visible on the map.
10. **Object list field** – name of object, date and time of last received location.
11. **Speed indicator** –shows the current speed of the object
12. **GPRS indicator** – shows the GPRS and the GPS status
 - **Grey icon** – no GPRS and GPS
 - **Orange icon** –no GPS signal
 - **Green icon** – GPRS and GPS are o.k.
13. **Object control**–allows to see object history, control objects using commands and edit object settings.
