

Mini DisplayPort/HDMI adapter cable, 5m (active)

Part No.: 41667

Description

- Supports video-mirroring and extended desktop modes
- Connectors: Mini DisplayPort Male to HDMI Male
- Compliant with DisplayPort 1.2 specification for both 1.62 and 2.7Gbps
- Compliant with HDMI 1.4a specification up to 3.0Gbps, 3840 x 2160@30Hz 24 Bit Colour
- 2 year warranty

This cable allows a Mini DisplayPort equipped computer or other device to connect to a 4K HDMI display or projector.

Notes about audio support:

Audio output over HDMI is only supported when the graphics card of the notebook or desktop computer supports audio output over DisplayPort. Several on-board graphics adapters such as Mobile Intel 4 Series Express Chipset in Notebooks (i.e. Dell E6400) do NOT support audio output over DisplayPort, even when HDMI support (Intel High Definition Audio HDMI Service) is installed for audio controllers. In such instances a separate audio connection has to be set up.

This adapter cable supports iMac / Mac / MacBook Thunderbolt ports.

If you are having trouble with 4K displays please refer to <https://support.apple.com/en-us/HT202856>

Technical details

- Supports resolutions up to 3840 x 2160
- Compatible with DP 1.2 and data rates of 1.62 and 2.7 Gbit/s
- Compatible with HDMI 1.4a specification and data rates up to 3.0Gbit/s and 3D 1080p

- Supports uncompressed audio (LPCM), as well as DTS, Dolby Digital, DTS-HD & Dolby True HD
- Full HDCP 1.3 content protection support
- 24 -bit audio sample size up to 192kHz sample rate
- Support DIP spread spectrum clocking
- Supports Eyefinity, Surround and Collage feature
- Supports resolutions up to 4K30 according to HDMI 1.4. HDMI 2.0 4K60 is not supported
