- 10 year warranty

Technical details

This adapter enables projectors with a P&D connector (also known as M1, M1-DA or EVC) to connect to an analogue DVI-A, digital DVI-D or digital or analogue DVI-I and USB ports of your computer. The USB 2.0 connection is used to supply commands from the projector's remote control to the computer - allowing you to scroll through PowerPoint or other Multi-media presentations and to update the firmware of certain projectors.
