

Product Information

Online Tank Monitoring (Android)

“Cloud Tank Monitoring App “

The ECO-MAT allows to check the level in liquid tanks and monitor them.

The ECO -MAT Tank-Monitoring App can adjust Alarm settings and tank configurations. The App then also displays the level within the tank.

Datentransfer mit dem ECOMAT (GPS/GPRS)

Der ECO-MAT ist ein Ultraschall Tank Monitor, der den Tankinhalt via GSM /GPRS an die zentrale Datenbank sendet. Der Sensor wird vorkonfiguriert geliefert.

Setting for Notification:

Alarm-Settings

This setting activates or deactivates the overall notifications.

Alarmtype

This setting defines if a high- or low-level alarm should be triggered.

Trigger Level

This setting requires percent level, that when crossed will trigger the alarm.

If for example a 80% and Type „High-Level“ is selected, it will cause an alarm when passing 80% of the tank content triggering an email to be sent to the defined email address.

If the Type „Low-Level“ is being selected and a level of 20%, an email will be triggered when passing below 20% of the tanks content.

Email

This is the email address for the high- or low level notification.

Displaying the level within the App

The Level in the App is updated once per day.

Email notification in case of an Alarm
