INTRODUCTION

Thank you for purchasing the KODAK LUMA 350 Portable Projector. This User Guide is intended to provide you with guidelines to ensure that operation of this product is safe and does not pose risk to the user. Any use that does not conform to the guidelines described in this User Guide may void the limited warranty.

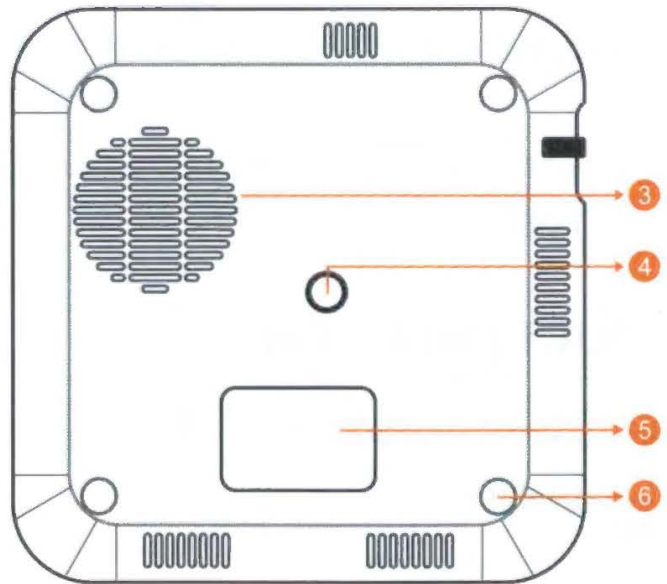

This product is covered by a limited one-year warranty. Coverage is subject to limits and exclusions. See warranty for details.

Please make sure to view and download the full user guide at www.kodakphotoplus.com

PRODUCT OVERVIEW

- | | |
|--|-----------------|
| 1. Lens | 1. Power |
| 2. Air Outlet | 2. Speaker |
| 3. Up | 3. Air Inlet |
| 4. Confirm / Return
(press more than 2 seconds) | 4. Tripod Dock |
| 5. Right / Fast Forward | 5. Rating Label |
| 6. Left / Rewind | 6. Non-slip Mat |
| 7. Down | 7. Focus Wheel |
| 8. Power Indicator | 8. Speaker |

- 9. Audio Output (3.5mm)
- 10. USB Input / Power Out
- 11. HDMI Input
- 12. DC Input (15V/1.5A)

Within two (2) minutes of turning on the projector, press and hold both the Vol + and Vol - keys for approximately three seconds. The remote's indicator light will flash quickly and then stop, indicating that the remote has successfully paired with the projector.

CHARGING THE PROJECTOR

Before using the projector, connect it to the charger and allow it to fully charge. Always use the original charger that was provided to ensure proper charging.

If the red indicator LED light is flashing, this means that the battery is low. While the projector is charging, the indicator LED will be a solid red light. Once charging completes, the indicator LED will change to a solid white light.

POWERING THE PROJECTOR ON/OFF

To turn the projector on or off, hold the power button on the side for three (3) seconds. Once powered on, tap the power button lightly to display the remaining battery percentage on the screen.

ADJUSTING THE FOCUS

If the image on the screen appears fuzzy or unfocused when you turn the projector on, use the focus wheel on the side to correct the image. Turn the wheel up or down until the image appears sharp and clear.

NOTE: If a specific image or video remains fuzzy after adjusting the focus wheel, try pressing and holding the confirm button to return to the main menu. If the main menu graphics appear clear and the image is still fuzzy, the problem may be the image or video quality.

ADJUSTING VOLUME

To adjust the device volume during playback, use the ◀+ and ◀- buttons on the remote control.

To adjust the volume without using the remote control, from the main menu, select Settings > Sounds.

CONNECTING TO AN EXTERNAL DEVICE

To access photos or videos stored on any USB drive, simply insert the drive into the corresponding port on the side. If you're using an HDMI compatible device, connect an HDMI cable from the device to your projector to access and view images and pictures. An HDMI-to-HDMI cable is included. If your device requires an adapter, you will need to purchase it separately. For audio devices or headphones, there is an AUDIO OUT jack on the left side.

NOTE: If you connect an HDMI device as well as a USB drive, the HDMI device will take precedence over the USB drive and you will need to disconnect it to access the other connected sources.

CONNECTING TO A WIRELESS NETWORK

Connecting to the wireless network will allow you to browse the web using your projector's built-in Android web browser, as well as download apps from the app store. This is a necessary step to allow you to take advantage of the Android operating system.

1. From the main menu, select Settings > WLAN.
2. Select the correct network from the list and use the arrows on top of the projector or the remote to navigate the keyboard and enter the password.
3. The projector should connect to that network whenever it is in range.

SCREEN MIRRORING (ANDROID/WINDOWS - MIRACAST®)

1. From the projector main menu, select “Screen Mirroring,” and then select “Miracast®”. The name of the projector will be displayed on the screen so that you can accurately identify it when attempting to connect.
2. Make sure your device is connected to the same network as your projector.
3. Activate the screen mirroring software on your device.
 - a. To activate screen mirroring on your Android™ device:
 - i. On Samsung devices, swipe down from the top notification bar to the expanded view, and then swipe left (if necessary) and touch the “SmartView” icon to activate screen sharing. **NOTE:** Check your device settings for the screen casting/screen mirroring options. The name of the function may vary by device model and service carrier. Other names used may include, “Cast,” or “Screen Mirroring,” as well as “Smart View”. All devices must be running at least Android version 4.1.2.
 - b. To activate screen mirroring on your Windows® 10 device:
 - i. From the start menu, select Settings.
 - ii. In the Settings menu, select Devices.
 - iii. On the left side of the Devices menu, select Connected Devices, and then click Add a Device.

4. Select the projector from the list of devices and select "Connect."
A dialog box will pop up on the projector screen for you to confirm the connection; use the arrows or the remote to highlight "Accept" and press the confirm button.
5. Your screen will now be mirrored to the projector.
6. When finished, select Disconnect on your device.
