With our detectable marking solutions, we support our food and beverage industry customers in ensuring the high standards required within the HACCP concept. Due to a metallic filler, our detectable Cable Ties are identified reliably by metal and X-ray detectors. Identification minimises the risk of contamination during the food production process. MultiCards provide maximal safety because of properties like corrosion resistance. We regularly check and confirm the safety properties in our accredited laboratory. Actual colour may vary, the tone does not affect the product characteristics. Not suitable for direct contact with food.

- Detectable by metal and X-ray detectors
- Visually recognisable by blue colour
- Corrosion resistant metallic filler
