Self-laminating labels, laser
### Material 1105 (White-Clear)

The high quality polyester material makes these labels especially suitable for self-laminating marking of wires and cables. The protective film provides effective protection against abrasion or soiling of the labels.

For cable markers with a total length of more than approx. 100mm, we use a slightly thicker material (type 1105). This allows the marker to be removed from the sheet more easily by hand and the greater rigidity of the material simplifies attachment onto a large cable or pipe.

For problem-free printing, we recommend TagPrint Pro software. This contains all the labels listed, which can be called up immediately. There is no need for time-consuming installation. For simple applications we recommend our MS Windows Word printer templates, from www.hellermanntyton.co.uk (download zone).

Features and Benefits
- High-quality self laminating labels
- Suitable for marking of wires and cables
- Laminating function gives excellent protection against humidity and mechanical abrasion
- Rounded edge design gives addtional bonding strength
- Thicker material (50micron) for longer labels
- Simple and efficient label design and printing with Tagprint Pro labelling software
- PDF templates available from www.hellermanntyton.co.uk for those wishing to use MS Word
- Clear protective box to ensures labels stay as good as new

Laminating the mark gives long-term print survivability.

MATERIAL	Type 1105, Polyester (PET), white-transparent (WH/CL), self-laminating
Operating Temperature	-40 °C to +150 °C
Curing Temperature	from +5 °C
Adhesive	Acrylic
Thickness of Foil (µm)	50 µm
Chem. Material Properties	Excellent resistance to alcohol, gasoline, cleaning solvents, butanol, ethyl and Butylcellosolve solvent, battery acid.

HF ✓   RoHS ✓

Software TagPrint Pro for troublefree printing see page 489.
For MS-Windows Word design templates for simple applications please refer to www.HellermannTyton.co.uk (downloadzone).
