# Cololight  Quick Start Guide

**Please read these operating instructions carefully and observe the safety instructions.**

**Intended use:**
Cololight is a modular, freely pluggable LED lighting system which can be remote controlled via smartphone and active WIFI connection. The manufacturer or dealer accepts no liability for damage caused by improper or incorrect use.

**Detailed information:**
A more detailed operating manual and much more information such as notes on wall mounting, expansion, special offers, voice control, app explanation can be found at www.cololight.de

**Danger for children:**
This product is not suitable for children under 3 years of age. Children under the age of 14 must use this product under parental supervision. Keep packaging material, foil bags and accessories away from children. The device is not a toy!  There is a risk of suffocation and swallowing.
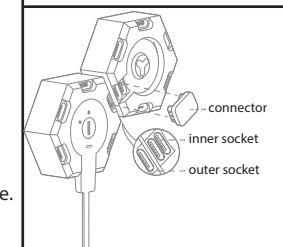

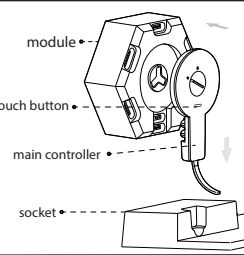

**Safety instructions:**
• The lamp may only be connected to a USB socket such as at PC or USB mains charger using the attached USB charging cable.
• If the cable, luminaire or plug are damaged, the luminaire must not be operated.
• The LEDs inside the modules are fixed and cannot be replaced.
• Clean the lamp only when it is switched off and without usage of water.
• Do not open the device or repair it yourself.
• Protect the lamp from splash water, moisture, excessive cold and heat!
• Do not make any changes to the lamp.
• Only use the lamp indoors.
• Disconnect the lamp from the socket when not in use.
• Connect the modules only with original plug connectors and when switched off!
• Make sure that the modules are fastened in such a way that they cannot injure anyone.
• Do not place any heavy objects on top of the modules.
• Do not operate the product unattended.
• Only operate the modules in well-ventilated rooms.
• If you have any questions or queries, please contact our customer service.

## 1. Assembly
Connect the main controller with the USB charging cable to a light module. The locking mechanism must be open (the slot faces towards the open lock) and then carefully pushed onto the back of the module. The lock can then be carefully fixed and closed with a cent coin.
Now insert the module into the socket.

connector
inner socket
outer socket

You can then connect further light modules (if available) to the base station. Use the supplied connectors for this purpose. One side of the plug must always be plugged into the inner socket of a double socket. The other side of the plug may only be plugged into an outer socket. There must be no distance between the single modules once connected.

## 2. USB Connection
Now connect the USB charging cable of the base station to a suitable USB power supply (ideally with more than 2A output power). If you are unsure, please contact our customer service.

## 3. Control Manually
On the back of the base station there is a touch-sensitive touch button with which you can manually control the light.

## 4. Control by Smartphone App
For a much more comprehensive control please use our Smartphone App for Apple iOS and Android. Just visit the App Store or Google Play Store and search for "Cololight."
Alternatively, scan the following QR code:

Then please follow the app instructions

www.cololight.de/getapp

## 5. WIFI Information
Please note that Cololight only supports a 2.4Ghz WIFI connection. 5Ghz networks cannot be connected. If you have any problems or questions regarding this topic, please contact our customer service or an IT specialist.

## 6. Warranty Information
All Cololight products come with a 12-month warranty on technical defects. A normal use according to the intended purpose is assumed. Keep the proof of purchase for a warranty claim. Not covered by warranty: Items without proof of purchase, items with defective housing or damage, items that have been exposed to liquids, dirt or contamination, and items that have minor defects or deviations from the product specification that do not affect the value or function of the product.

## 7. Disposal Instructions
Products that are marked with the adjacent symbol may not be disposed of as unsorted municipal waste (domestic waste). They should be disposed of through separate collection of electric and electronic devices. This product and its packaging are manufactured from materials that can be recycled by specialist recycling companies.

## 9. Declaration of Conformity
Klaus Stephan GmbH hereby declares that this device complies with the essential requirements and other relevant provisions of Directive 2014/53/EU.

These may be used for privately used products only in accordance with WEEE Directive 2012/19/EU.

The declaration of conformity according to this directive can be found at www.cololight.de/support
