

inolight CL1

Arc lighter

The inolight CL 1 is a revolutionary arc lighter that uses electricity instead of butane to generate a plasma wave hotter than fire. There's no need to use fossil fuel anymore - the inolight CL1 may easily be charged via USB in just under 3 hours and one charging lasts for about 100 ignitions! Thanks to its flexible tip and to the fact that neither wind nor water has a negative effect on the ignition, the CL 1 may be used in close to any angle and environmental condition, making it a very versatile lighter.

Highlights

- Arc lighter featuring rechargeable 3.7V Li ion battery
- No fossil fuels necessary - neither Butane nor Gasoline
- High heat intensity, no flame
- Wind- and waterresistant
- Flexible tip for versatile operation
- Easy to use, internal fuse (auto-off after 10 seconds)

Scope of delivery

inolight CL1, USB charging cable, user manual

	device (WxHxD)
dimension (cm)	23,5 x 2,5 x 1,5
weight	90g
