

inolight CL3

Arc lighter

The inoLight CL 3 is a revolutionary arc lighter that uses electricity instead of butane to generate a plasma wave hotter than fire. There's no need to use fossil fuel anymore - the inoLight CL3 may easily be charged via USB in just under 3 hours and one charging lasts for about 100 ignitions! Thanks to the fact that neither wind nor water have a negative effect on the ignition, the CL 3 may be used in close to any angle and environmental condition, making it a very versatile and well-designed lighter.

Highlights

- Arc lighter featuring rechargeable 3.7V Li ion battery
- No fossil fuels necessary - neither Butane nor Gasoline
- High heat intensity, no flame
- Wind- and waterresistant
- High-quality design and material
- Easy to use, internal fuse (auto-off after 10 seconds)

Scope of delivery

inolight CL3, USB charging cable, user manual

	device (WxHxD)
dimension (cm)	25 x 3 x 2
weight	155g
