

### **Model Number**

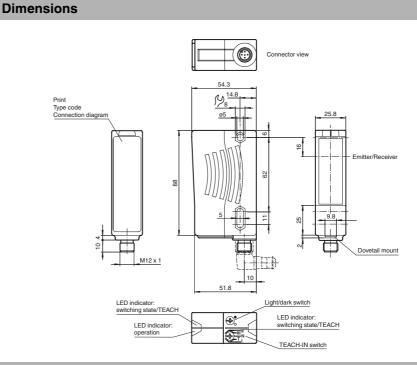

#### RL28-54-G/47/105

Retroreflective sensor

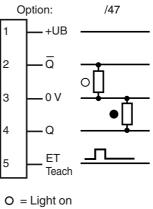

with 5-pin, M12 x 1 plastic connector

### **Features**

- Detects transparent objects, i.e., clear • glass, PET and transparent films
- TEACH-IN switch for setting the • contrast detection levels
- Automatic adjustment in case of • soiling in contrast detection mode
- Ultra bright LEDs for power on, weak ٠ signal indication and switching state
- Flashing power on LED in case of • short-circuit
- Not sensitive to ambient light, even • with energy saving lamps
- Waterproof, degree of protection IP67 ٠
- Protection class II •

### **Electrical connection**

### = Dark on

### Pinout

dance with EN 60947-5-2 Wire colors in acco

Technical data			Accessories
General specifications			ONH OF
Effective detection range		0 5.6 m	OMH-05 Mounting aid for round steel Ø 12 mm o sheet 1.5 mm 3 mm
Reflector distance		0 5.6 m	
Threshold detection range		7 m	
Reference target		H85-2 reflector	OMH-07 Mounting aid for round steel ø 12 mm o sheet 1.5 mm 3 mm
Light source		LED	
Light type		modulated visible red light , 660 nm	
Polarization filter		yes	
Diameter of the light spot		approx. 90 mm at a distance of 5.6 m	OMH-21
Angle of divergence		Emitter: 1 ° Receiver: 1.2 °	Mounting bracket
		50000 Lux	ОМН-22
Ambient light limit		50000 Lux	
Functional safety related para	meters		Mounting bracket
MTTF <sub>d</sub>		1020 a	OMH-MLV11-K
Mission Time (T <sub>M</sub> )		20 a	-
Diagnostic Coverage (DC)		0 %	dove tail mounting clamp
Indicators/operating means			OMH-RLK29-HW
Operation indicator		LED green, flashes in case of short-circuit	
Function indicator		2 LEDs yellow for switching state, stability control, TEACH-IN	Mounting bracket for rear wall mounting
Control elements		and contrast detection mode rotary switch for light/dark, 5-step switch for contrast recognition	OMH-RL28-C Weld slag cover model
		adjustment	
Contrast detection levels		10 % - clean, water filled PET bottles 18 % - clear glass bottles 40 % - colored glass or opaque materials adjustable by Teach-In key or external wire	Other suitable accessories can be found www.pepperl-fuchs.com
Electrical specifications			
Operating voltage	UB	10 30 V DC	
Ripple	СB	10 %	
No-load supply current	I <sub>0</sub>	≤ 50 mA	
	10		
Input		Ext Teach In input (ET)	
Function input		Ext. Teach-In input (ET)	
Output			
Switching type		light/dark on switchable	
Signal output		2 PNP, complementary, short-circuit protected, reverse polarity protected , open collectors	
Switching voltage		max. 30 V DC	
Switching current		max. 200 mA	
Voltage drop	U <sub>d</sub>	≤ 2.5 V DC	
Switching frequency	f	1000 Hz	
Response time		0.5 ms	
Conformity			
Product standard		EN 60947-5-2	
Ambient conditions			
Ambient temperature		-40 60 °C (-40 140 °F)	
Storage temperature		-40 75 °C (-40 167 °F)	
Mechanical specifications		· · · · ·	
Housing width		25.8 mm	
Housing height		23.8 mm	
Housing height			
0 1		54.3 mm IP67	
Degree of protection			
Connection		5-pin, M12 x 1 connector	
Material			
Housing		Plastic ABS	
Optical face		Plastic pane	
Connector		plastic	
Mass		70 g	
Annual and and the			
Approvals and certificates			
Protection class		II, rated voltage ≤ 250 V AC with pollution degree 1-2 according to IEC 60664-1	
UL approval		cULus	
CCC approval		CCC approval / marking not required for products rated ${\leq}36$ V

### **Curves/Diagrams**

## **TEACH-IN**

· Switch position "N" (standard operation):

LEDs are lit when the light beam is unobstructed, they flash when the value falls short of the function reserve and they go out when the beam is interrupted.

- Switch position "T" (Teach-in mode): After 1 s, the LED flashes slowly (approx. 1.5 Hz). The sensor is now ready to be set for a specific contrast detection value
- either via the mechanical switch (pos. I, II or III) or an external signal.
- Switch positions "I", "II" and "III" (contrast detection mode)
- Contrast recognition values: I for 10 %, II for 18 %, III for 40 %
- 1. LED permanently lit: light path unobstructed
- 2. LED off: element to be sensed detected
- 3. LED flashes rapidly: detection failure, excessive soiling, function reserve too low.
- Ext. TEACH-IN input
- The desired contrast recognition capability can be adjusted by applying of a logic "high" pulse with a certain pulse lenght when the switch is in position T. Ŀ 50 ms (30 ms ... 100 ms)
- 11: 150 ms (100 ms ... 200 ms) 111: > 200 ms
- It is possible to change the contrast detection level without re-teaching. For contras detection mode (Teach-Mode) the stability reseve must be at least 2.5 (see curve ..relative received light strength")

### Additional information

### Mounting instructions:

The sensor is held in place by two pass-through drill holes for M5. The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nuts in place with spring screws to prevent the sensor from going out of adjustment.

Outdoor mounting:

The sensors must be protected from shock and splashed water. It may be necessary to provide a covering.

# Adjustment:

٠ -111 Align the unit to the reflector in the "N" switch setting. The yellow LED must be lit constantly. Move the switch to the "T" setting and wait for about 1 sec. until the yellow LED starts flashing slowly. Move the switch to the setting for the desired contrast detection level: "I" for 10%, "II" for 18%, "III" for 40%.

#### or

In switch setting "T", select the appropriate contrast detection level by applying a pulse through the control lead to connection pin 5 (see "TEACH-IN").

#### **Contrast detection levels:**

The output becomes inactive if dirt and dust make it impossible to readjust the setting. In this case the yellow LED will flash quickly.

If dirt and dust continue to accumulate, detection of slight contrasts can no longer be guaranteed.
