

## Data Sheet

### 4pcs DIY PCB Set, 100 x 160 mm, Pitch 2,54mm

|                          |   |
|--------------------------|---|
| Material                 | FR-4 Epoxy                                  |
| Layer                    | 1   |
| Board size               | 160 x 100mm ± 1mm                           |
| Board finished thickness | 1.6mm ±0.1mm                                |
| Surface technioque       | Copper plated with subtractive              |
| Copper thickness         | 35um ±5um                                   |
| Drilled hole size        | 1mm ± 0.1mm                                 |
| Min. spacing             | 0.5mm ± 0.05mm                              |
| Solderability            | 260°C at 3s - 1.1%                          |
| Flammability             | V-0   |
| Surface Resistivity      | $1.0 \times 10^6 \text{ M}\Omega$           |
| Volume Resistivity       | $1.0 \times 10^8 \text{ M}\Omega\text{-cm}$ |
| Arc Resistance           | 125sec                                      |
