

Your personal eyewitness
on the road – in Full HD

MiVue™ 731

NO MORE WORRY BEHIND THE WHEEL

Roads are dangerous; they are often busy and fast-moving, putting you at risk. And it's not only accidents that are on the rise, but also cash-for-crash scams. The MiVue 731 has your back whilst you're on the road, recording every mile of your journey so you don't have to worry.

Your safety is at the forefront Advanced Driver Assistance Systems

We understand how important it is to feel safe on the roads. That's why the MiVue 731 comes with safety features. The MiVue 731 comes with Advanced Driver Assistance Systems, including Lane Departure Warning Systems, Forward Collision Warning System and Fatigue Warning. These features all work together to give you peace of mind during your journey.

High quality, Full HD video recordings

Created to capture every detail, the MiVue 731 provides Full 1080p HD footage at 30 fps with 130° wide angle viewing and F2.0 aperture. For every second, you will get 30 frames of video, ensuring that all recorded footage is clear and indisputable. Begin recording when you start your drive: the MiVue 731 dash cam starts recording the moment you start your car, storing your driving information.

GPS built-in – to record location and speed

A GPS location and your speed are logged on every recording; ensuring that you have the important evidence from your drive. You can have speed stamp on recording or turn it off and even check what speed you drive at Mio MiVue Manager.

When crisis strikes, the built-in G sensor stores

In the event of an accident or a sudden change of motion, the device's built-in G sensor instantly records you vehicle's movements and ensures the recorded

Record at all times with Parking Mode

With the latest motion detection technology, MiVue 731 can automatically activate and record videos when a motion is detected near the front of the vehicle. This helps collect evidence even when you're not in the car.

MiVue™ 731

Features

- **2.7" (6.9cm) screen** – intuitive and user friendly
- **Full 1080p HD recording at 30 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **130° wide angle view** – to clearly capture every detail at critical moments with wide dynamic range technology
- **F2.0 aperture lens** – allows more light through the sensor for superior video quality, particularly in low light condition
