Hikvision Fast Fever Screening Solution for Hospital

HIKVISION®

▶▶ Solution Introduction

The Solution uses thermal camera to efficiently detect the person with abnormal body temperature, and help the reception to timely guide the suspected fever patients to the fever clinic for further check and medical treatment.

Easy installation and operation

⇨

Skin-temperature based detection in high accuracy (±0.5℃) without surrounding interference

⇨

ID:1
Max 36.5℃

Fast fever screening with abnormal temperature alarm (pop-up image/audio warning)

▶▶ Solution Components

HD Bullet Fever Screening Thermographic Camera

- Temperature range: 30℃ to 45℃;
- Temperature accuracy: ±0.5 ℃
- Flexible tripod or wall mounting

+

Network Video Recorder

- HDMI video output at up to 4K (3840 × 2160) resolution
- Supports temperature triggered alarm
- Pop-up Image and audio warning for temperature exceptions
- GDPR compliance (no data storage)

+

LED Monitor

- LED backlit technology with full HD 1920×1080
- Wide view angle: 170°(H)/160°(V)
- Multiply inputs: HDMI, VGA
