

# HANDS-FREE DOOR OPENER

Reduce the risk of infection with the new door opener

An easy way to open and close doors with the elbow or forearm

Lower disease rates through effective prevention

**Increase hygiene level!**

Everyone touches door handles. They are particularly affected by germs - especially in places with a lot of traffic. Use hands-free door openers to simply and effectively reduce transmission possibilities of e.g. corona and influenza viruses in all areas, such as companies and public institutions.

Infection protection

No touching of door handles

Easy to clean

Easy to install

For almost all door handles

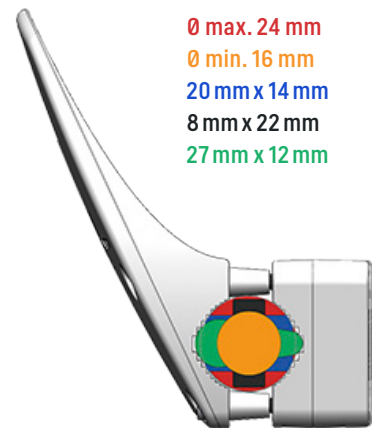

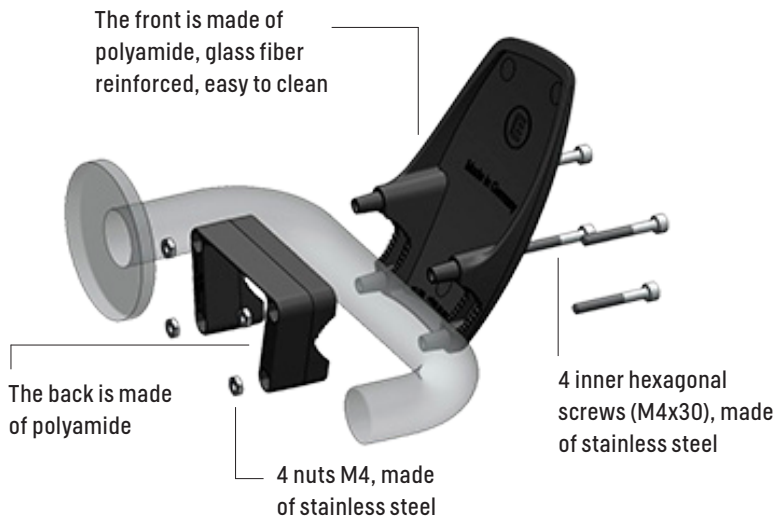

**MADE  
IN  
GERMANY**

Clean  Health<sup>®</sup>

# UNIVERSAL HANDS-FREE DOOR OPENER

## TECHNICAL SPECIFICATIONS

The hands-free door opener is suitable for the installation on round, oval and angular door handles with a diameter of 16-24 mm. The grid holder as well as the four screws facilitate an easy and safe way of installation.

Tools required: Allen key 3 mm.

Note: Usage on fire protection and fire compartment doors must be checked individually.
