applied by someone with a certain level of electrical knowledge. Please read and make sure that you understand how to operate the product before using it. Please keep this

Please read the manual carefully before using this product. This product should be

user's manua

manual readily accesible for future references when needed

Please comply with the warnings indicated before

Please do not exceed maximum rated voltage during usage in order to prevent

warning

operating instructions

Charging

Comply with the warnings indicated below for they are important:

precautions

product, follow National and IATA regulations.

The product contains a non removable Li-ion battery. For the delivery of the Please do not subject the product to high temperature to avoid scalding Please do not apply AC power supply to avoid breakage

tester malfunction or fire.

- Please do not use it in flammable or explosive environments.
- Please do not disassemble, repair or alter this product Please do not use it in environments with water, oil, chemicals or steams.
- Please do not exceed the rated voltage and current,
- Please do not exceed the rated environment.
- Please observe electrical polarity when making connections
- Please connect load correctly.
- Please avoid short-circuiting the load
- Please do not operate it, if the housing is broken
- When disposing the tester, please treat it as an industrial waste

warranty

best solution to you contact our offices near you and present the failure in details so that we can provide the Our products have been tested prior to shipping, however if matfunction occurs, please

Power bank

on without the beeping sound.

Silence Mode

again, the sensor tester will be re-activitied

from the sensor the corresponding NPN light or PNP light on the sensor tester will switch at the same time then the test box will enter into silence mode. When there is an output

Press and hold Pulse Button for 5 seconds, the NPN light and PNP light will flicker twice

into sleep mode to lower power consumption. Meanwhile the BAT light will flicker 2 When the sensor tester is on standby for mont then 2 minutes it will automatically enter Sleep Mode

second Intervals to remind user to switch the power off. When pressing the pulse button

When BAT light turns into red, it indicates that test box needs to be charged. During chiliging, it remains in red until the sensor tester is fully charged and then it becomes

Warranty Period The warranty period is 1 year starting from the shipment date

Scope of warranty

If maifurction is caused by our company within the warranty period, free service of repairing shall be offered. The cases tisted below do not fall into the scope of warranty,

- ANTICOTOR (COMPANY) (COMPANY) (COMPANY)
- Command to specify the specific of contractions of passing the polymers.

Please make sure the power is off before connecting the cable

OUT port and the device that needs charging. The sensor tester will begin to charge the Sensor tester can serve as a power bank. Connect the USB charging cable between the

device when the power button is switched on.

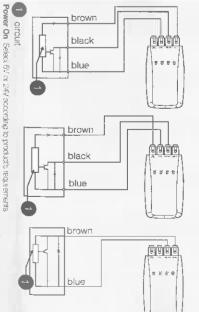

- Please make sure the voltage fluctuations are within maximum rated range
- Settocrocyje totach (Settochino introduce introduce introduce introduce international When the power is on, please do not apply the device in the first 0.5 s.
- Please do not subject the device to dust, dirt or vapor Please do not subject the device to water, oil or organic solvent such 1s diluents

operating instruction

Connecting the product cables to the tester accordingly at Three Wired

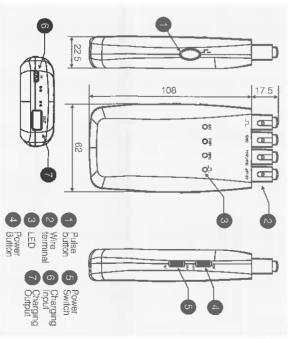

Three wires

Two wires

Pulser Liser can press hibe buildin to aupply power to the sensor. When pressing fittles Buildin, the eight indicator valide on. Supplying output voltage in the red wire terminal. The output voltage is determined by the power exition. Test: Statich the power flution; the sensor fester will even the sensor. If there is an outral from the sensor after corresponding NAN light or PNP light will be on along with a beeping sound.
