TDST DOC104278

<b>Designation</b>	<b>Chronis io</b>
<b>Reference</b>	1805227 Chronis io (FR/DE) – 1805228 Chronis io 10L (DE – FR – EN – NL – IT – ES – EL – CS – PL – HU)
<b>Range</b>	<b>io</b>

## FUNCTIONS

Front side

Back side

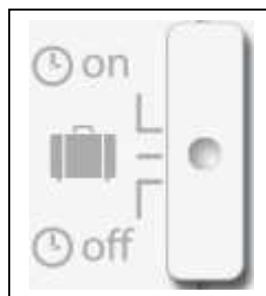

Button to access the Instal  
mode

Button to store the  
actuators

➤ **Three user modes**

Timer On  
Presence simulation  
Timer OFF

- **Timer OFF**  
Command available

Up order  
Stop or My order  
Down order

Navigation buttons

○ **Timer ON**

▪ **Programming week**

Typical pre-programmed week  
 Monday=> Friday: UP at 7h30, DOWN at twilight  
 Saturday-Sunday: UP at 8h00, DOWN at twilight

Be careful: Change Summer & Winter time  
 - If order between 2am and 3am  
 -> in winter there is a risk that is played 2 times  
 -> in summer orders will not be played

• **Fixed time**

• **Twilight time**

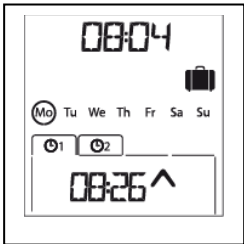

▪ **1 to 4 order per day**

▪ **Programming Up or My or Down**

○ **Presence Simulation**

- The planned orders are played with a lag of 0 to 30 minutes.  
 - All orders scheduled between 23h31 and 23h 59 to be played later at 23h59 => we do not shift on the day after  
 - **No Backlight in this mode**

➤ **Icon battery lifetime in manual and automatic mode**

Automatic mode

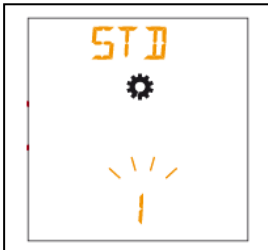

Manuel mode

**When the battery icon appears, the Backlight is cut off. (To save life time)**

➤ **Instal mode**

- Mode choice to pilot (4 modes available)

Mode standard 1 = for all product (0% - 100%) **selected by default**

Behavior for all products:

- ^ = Go to Up (0%)
- my = Stop or go to my
- ∨ = Go to Down (100%)

Mode standard 2 = recommended for Heat & Light application

Behavior:

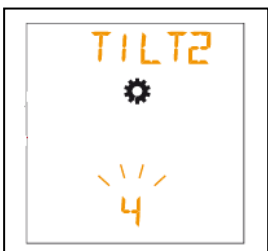

- |                       |  |
|-----------------------|--|
| Short press <0.5s     | Long press >0.5s                                     |
| ^ = Go to Up (0%)     | = Dimming to X% in link with the during of the press |
| my = Stop or go to my |  |
| ∨ = Go to Down (100%) | = Dimming to X% in link with the during of the press |

Mode standard 3 = recommended for EVB application

Behavior:

- |                              |                     |
|------------------------------|---------------------|
| Short press <0.5s            | Long press >0.5s    |
| ^ = Orientation of the slats | = Go to Up (0%)     |
| my = Stop or go to my        |                     |
| ∨ = Orientation of the slats | = Go to Down (100%) |

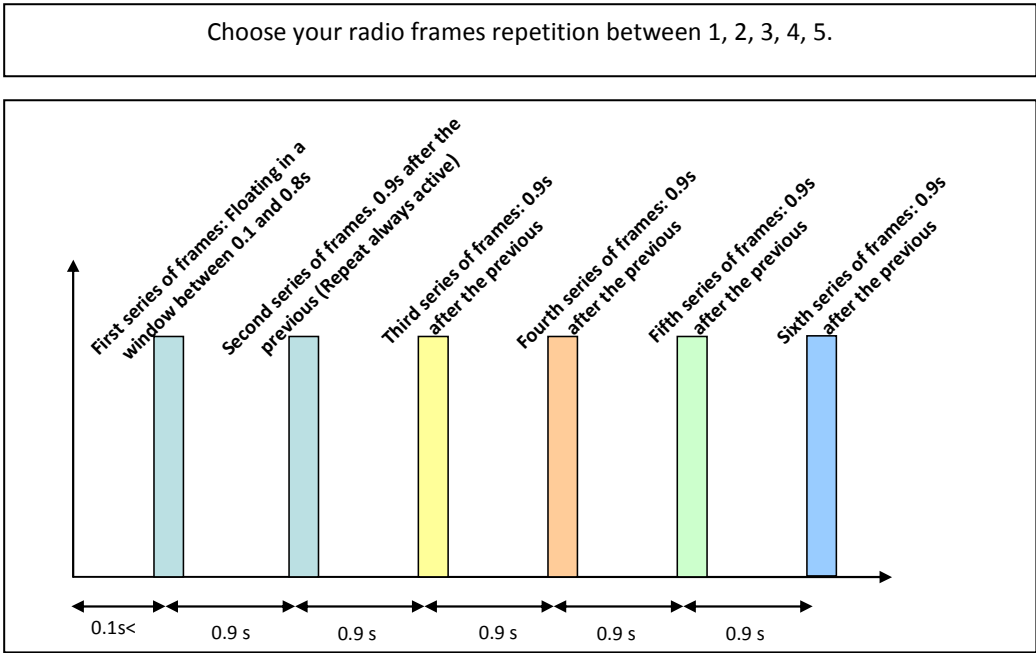

Mode standard 4 = recommended for IVB application

Behavior:

- |                       |                            |
|-----------------------|----------------------------|
| Short press <0.5s     | Long press >0.5s           |
| ^ = Go to Up (0%)     | = Orientation of the slats |
| my = Stop or go to my |                            |
| ∨ = Go to Down (100%) | = Orientation of the slats |

- Radio frames repetition (Repetitions are only applicable for “Timer ON” or “presence simulation”).

If there is a radio problem in the installation, you can increase the number of repetition to be sure the actuators receive the orders.

- « 1 » is selected by default  
 - First series of frames: Floating in a window between 0.1 and 0.8s.  
 - Second series of frames. 0.9s after the previous (Repeat always)

- Third series of frames: 0.9s after the previous

- Fourth series of frames: 0.9s after the previous

- Fifth series of frames: 0.9s after the previous

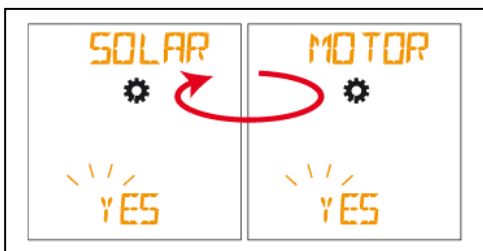

- Sixth series of frames: 0.9s after the previous

- Solar motor. (If there are autonomous actuators in the house)

« NO » is selected by default

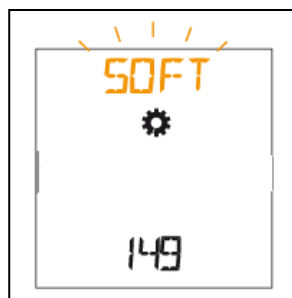

Autonomous motor is wake up regularly for short time. When the autonomous mode is activated, the duration of the transmission signal is sufficiently long to overlap a wakeup period of the autonomous motor.

**Be careful, in this mode the timer batteries life time is deteriorated significantly.**

- Software version. (Information about the software version in the product)

- Reset.

Restore factory mode: the date, time, twilight, programming weeks, the time change automatically (W / S), the control mode used, the number of repetitions and the mode "solar motor". **The actuators remain stored!**

## TECHNICAL SPECIFICATIONS

Box	Material	ABS & PC
	Color	Pure
	Size	120 x 80 x 21 mm
	Protection factor against solid & splashproof	IP 20
Battery	Voltage	1.5V
	Type	LR03 AAA (not compatible with rechargeable batteries)
	Number	x2
Battery lifetime (at ambient temperature in typical conditions) (4 automatic orders, 2 manual orders per day without repetition and solar mode)		24 months
Radio frequency EIRP (Equivalent Isotropically Radiated Power )		868,95Mhz +/- 1Khz +10 dBm
Modulation type		FSK deviation ± 19.2 KHz
Protocol Antenna		io-homecontrol Integral
Range (minimum guaranteed)		20 m through 2 concrete walls
Temperature range	Storing	-20°C / +60°C
	Working	0°C / +60°C
Drop test		Installation: at 0°C 1/face (height : 1,2m) Using: at 20°C 1/face (height : 1,2m)
Weight		145 g (including battery)
Standard (CE)		EN 61000-4-3 (immunity) EN 61000-4-2 (immunity) FN 300220-1 (Radio)

## COMPATIBILITIES

Compatible with all io product for basic order (0% - 100%)

Except:

- with Alarm profil not compatible

Special Funtionnality:

All profils (actuators) that support the management of the linear speed

- ⇒ Automatic Orders will be played at slow speed
- ⇒ Manual orders will be played with normal speed

See Matrix compatibility io

## BEHAVIOR

### Schedule collision:

- If two orders are scheduled at the same time, only the second order will be played in relation to their position in time slots.
- A manual command has priority over an order issued automatically.  
If a manual command is requested at the same time as the launch of an automatic time range, then it will be played in releasing the button

### Random time:

The scheduled times are triggered randomly within a window of 30 minutes after the normal release schedule:

Special case: If the time between two events <4 minutes, the first hour is played in normal mode.

### Timing screen display ON and Backlight:

- TIMER ON INIT: screen display ON= 10 min, backlight = 5s
- TIMER OFF INIT: screen display ON= 2 min, backlight = 5s
- INSTAL mode: screen display ON= 2 min, backlight = 5s
- Submenu SET: screen display ON= 2 min, backlight = 5s
- Submenu PROG: screen display ON= 2 min, backlight = 20s
- Demo mode: screen display ON during demo mode, backlight = 5s at each launching of scenario
- TIMER ON: screen display ON= 1 min, backlight = 5s
- TIMER ON SIMUL: screen display ON= 1 min, backlight = 5s
- TIMER OFF: screen display ON= 1 min, backlight = 5s
- ERROR: screen display ON= 1 min, backlight = 5s

### *Automatic orders*

- TIMER ON: screen display ON= 1 min, backlight = 5s
- TIMER ON SIMUL: screen display ON= 1 min, backlight = 5s

### Battery lifetime:

When the icon appears, the backlight doesn't light ON

The low battery indication is filtered, when the threshold is detected, it remains valid (pictogram display) to change the battery

Low battery threshold = 2.53V

Out battery threshold = 2.43V

**!!! It is possible to still have the low battery indicator after changing the battery (even with new batteries). To solve this problem remove the batteries, press a button and replace the batteries.**

### Display next order:

Next order is displayed only if the current day

### *Twilight*

The time is displayed on a rotating week.

Eg: today is Wednesday, Monday and Tuesday time corresponds to next Monday and

Tuesday, not yesterday

### Prog button:

Prog button is not available in submenu PROG, submenu SET, demo mode and in INSTAL mode

## BEHAVIOR with actuators

### Lighting NIKO

- With an automatic order → Progressive lighting.
- With manual order → Instant lighting.

### Lighting Velux

- No feedback when pairing

### Dual Roller Shutter

- Impossible to stop the product if we are in mode 4
- Impossible to drive actuator if we are in mode 2

### If Solar MOTOR = YES

- microbreaks when piloting in dead man (Altus Gradhermetic(X07)VR HOLLA (X10), VR TEBA(X07), Bridge EVB(A08))
- No feedback with Lighting receiver (X1.14)

### GO (X07) with card <X08: Mode 1 with photocell

- Impossible to drive GO with automatic orders
- No pedestrian opening with manual orders

### GDO (X40) with card <X08 without photocell

- **!!!! Possible to manage GDO in automatic orders → Non-compliance with the standard EN12453**

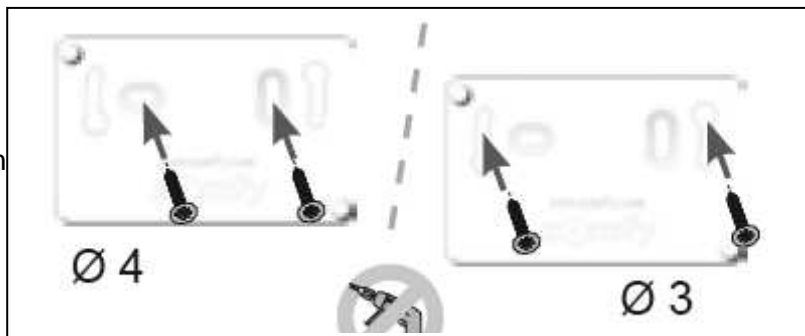

# BEHAVIOR with My

24.58 Swinging shutters	no existing product	SOMFY		OK
	no existing product	Other	OK	Management favorite on the opening position.

## Installation

Two brackets are available:

- one for screws diameter 4mm
- another for screw diameter 3mm

Keeping the product on the bracket is secured to a mounting plane with a drop <math><0.5\text{ mm}</math>
