# Hubs & Adapters

## USB-C™ Hubs & Adapters

USB-C™ is a new standard of USB that handles data transfer, video output and power input, allowing transfer speeds of 10Gbps, as opposed to the current 5Gbps rate available with USB 3.0, as well as faster charging.

USB-C™ ports are already included in devices such as the newest laptops, phones, and tablets and—given time—will spread to pretty much everything that currently uses the older, larger USB connector.

However, it's likely that you will need to continue to use your older USB-A peripherals, charge your devices, provide extra ports and take advantage of USB Type-C's ability to output 4K video.

This is where our new range of Type-C hubs and adapters come into play!

HDMI

USB 3.0

VGA

GIGABIT ETHERNET

SD/MICROSD
