Sticky Insect Trap with UV light

The hygienic way of catching insects

Summertime? Insect time! When it is warm outside, flies and other insects have ideal conditions. During this time, many insects will find their way into your home. Here they can get pesky very quickly. But what can you do about it?

Our Sticky Insect Trap attracts many types of flying insects with ultraviolet light. The yellow colour of the replaceable sticky glue boards lures in many types of insects as well - without any chemical attractants. The insects will stick to the surface and they are caught - without using any poison, without spreading insect particles all over the room and without any unpleasant odours. Simply set the trap on an even surface or hang it to a wall by using the hangers integrated into the back of the device.

We recommend activating the trap before using the infested room. Without any distraction by humans, the insects will find their way into the trap more quickly. Make sure to keep the win-

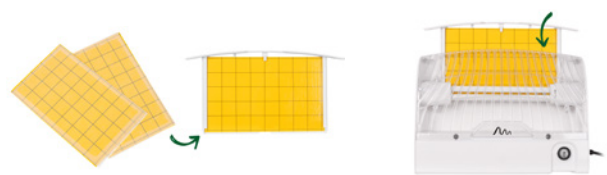

dows shut when using the trap in order to not lure any more insects into the house.

3 sticky glue boards included. Replacement glue boards are available separately (Art. No. 62288)

Additional information

- **Dimensions:** 30,5 x 22 x 7,5 cm (W x H x D)
- **Packaging dimensions:** 35,5 x 22,8 x 9 cm (W x H x D)
- **Product images**
- **Packaging units:** 10 units per package

Specifications

- **Power supply:** 230 V/50 Hz
- **Power:** 12 W
- **UV light range:** up to 100 sqm
- **UV lamp:** 365 nm
- **Hangers integrated into the back of the device**
- **Power cord:** approx. 1.3 m
