EMI-940 Pt-100 Input Module

: EMI-940 Pt-100 Input module

Function : Thermoresistance input

: Pt-100 Input sensor types

Dielectric strength

Insulation resistance

: +/- 0,5% FS with ESM-9950 Accuracy

> : From device supply to module output $_$ 2kV \sim From device around to module output N/A

: From device supply to module output _>999,9MOhm

From device ground to module output _>999,9MOhm

Overall size of the equipment $: 18mm \times 75,2mm \times 41,4mm$

: ESM-9950 Applicable products

Pt-100 Input Module Modu**l**e labels 14 Module-

Modul presenting label

Before the module installation you must read instruction manual of which applicable product,

PACK LIST

Please visual check

- 1 piece of EMI-940 Pt-100 input module
- 1 piece of EMI-940 module presenting label

Thank you very much for buying EMKO's product.

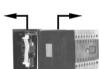

Installing and Pulling Out Input/Output Modules

 ϵ

Suppress to the lock pins where top and bottom of the controller.

Pull the cover case with your other hand from front panel to rear

Pull out the cover case from the controller

Slide input/output modules into socket. Pull out the module from it's socket, instead of this module install the new one or other module user wants to use.

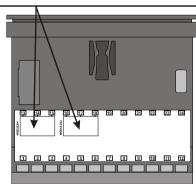

Replace the cover case by taking care of the terminal numbers should be at right orientation.

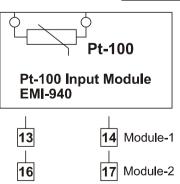

After adding or changing modules to the unit, these changes must be taken into consideration while mounting of the unit to the system. If mounting is incorrect, it can cause accidents to harm system, operator or person who does the mounting. Responsibility of these kind of harmful events belongs to the user.

After the module installed to the device successfully, please to stick on module presenting label where to participate in the module packet, to suitable module presenting box where on the device label.
