PEN

Pen 3in1 stylus and stand

FIXED Pen is a practical help for every smartphone or tablet owner. It hides three useful features to make your everyday life easier.

As a stylus, it's designed to conveniently handle all of the capacitive displays and dramatically improve work and writing on your smartphones or tablet. The rubber tip is gentle on the display, and you will not have to deal with constant smudges and fingerprints.

Simply turn the stylus into a classic pen that you will always have at your fingertips.

The FIXED Pen can also serve as a stable base for your device, thus fulfilling the function of a practical stand. You can conveniently watch movies, browse the web, or make a video call.

FIXED Pen is available in three versions – aluminium, plastic and bamboo. All three types have an antibacterial surface.
