

COM-TTL-RS485

UART TTL - RS485 converter

This UART TTL to RS485 converter allows you to add an RS485 interface to your single board computer.

The module is easy to operate and is controlled via the UART interface. With a transmission range of up to 1 km, data transmissions with widely spaced devices are no problem. Its design and size make the module highly integrable. Due to its high immunity to interference, it is often used in industrial environments.

MAIN FEATURES

Colour	Black
Chipset	74HC04D, XL485
Special features	Allows up to 128 devices to access the bus Status LEDs on transmit and
Dimensions	43 x 15 x 3 mm
Items delivered	TTL-RS485 converter

FURTHER SPECIFICATIONS

Operating voltage	5 V
Logic level	5 V
Transmission distance	Up to 1 km
Operating temperature	-40°C to 85°C
