VIDEO BABY MONITOR VM-F200

Watch baby dreaming

Thanks to the VM-F200 baby monitor, parents will finally be convinced that baby is sleeping well and safely. Day and night, the 2.4" screen coupled with a digital zoom and infrared night vision, makes it possible to keep an eye on baby while continuing his activities. Thanks to its numerous features such as the two-way communication function or the nightlight, baby will fall asleep with complete peace of mind.
