

VIDEO BABY MONITOR VM-F600

As close as possible to baby

Thanks to the VM-F600 baby monitor, parents will have the certainty that baby sleeps serenely and safely. Equipped with a 5" high resolution screen coupled with a digital zoom and infrared night vision, this baby monitor allows you to check that baby is sleeping well. Thanks to its numerous features such as two-way communication or the possibility of emitting a night light or lullabies, baby will fall asleep in complete peace of mind.
