## VIDEO BABY MONITOR VM-M500

### Be reassured when baby sleeps

The VM-M500 baby monitor allows you to keep an eye on your baby with complete peace of mind. The 4.3" screen coupled with panoramic and infrared night vision will transmit baby's every move. Thanks to the VOX mode, the baby monitor goes into standby mode as soon as it no longer hears any sound and is triggered at the slightest noise. Among its many features, the range temperature monitoring, the two-way communication or the possibility of giving off a nightlight or lullabies, will allow baby to fall asleep in complete tranquility.

Product Ref. : TF-VM-M500

Screen size 4.3"

Temperature display and  
alarm

Zoom, Tilt,  
Rotate function

Nightlight

DESIGN - QUALITY - SIMPLICITY
