

MAGNA HOLD

MH5 Specifications

Capacity : 589kg/pc
Material : Steel
Footplate size : NA
Overall Size : 107x(47-61.5)x(64-82) cm
Overall Size Folded : NA

1. Load capacity is 589kg per sawhorse, and when paired, can safely hold up to 1178kg
2. All legs are independently adjustable, from 64cm to 82 cm, allowing you to use the sawhorse on uneven surfaces if necessary
3. Non-marring feet help to stabilize the sawhorse and will help protect your finished flooring
4. Top surface has shallow channels which help support non-flat work items such as pipes or dowels
5. Deep **2 x 4** support arms assist in creating a flush table top when paired, giving you a truly balanced and adequately supported workspace
6. Built-in handle is made of high-impact plastic, making it easy to move the sawhorse around your job site
7. Folding legs make storage and transportation a simple task
8. Constructed from sturdy, high-grade steel for increased strength and durability with rolled edges for a safe working environment
