

650W/1200W Modular Power

NMP series

■ Features

- Medical (2x MOPP) ITE safety approvals
- Suitable for BF application with appropriate system consideration (Touch current < 100uA/264VAC)
- 1U low profile
- Universal AC input / Full range
- Output voltage and current programmable
- Built-in parallel function / output programmable / global enable / remote local ON-OFF / auxiliary DC output / over temperature alarm / DC OK
- Cooling by thermostatically controlled fan with fan alarm function
- Protections: Short circuit / Overload / Over voltage / Over temperature for all output modules
- 5 years warranty

■ Description

NMP family is a 1U low profile modular and configurable type power supply from MEAN WELL. This family comprises two power wattage for the line-up, 650W and 1200W, and the output modules deliver up to 240W with adjustable options for the major working voltages used in the industries 5V, 12V, 24V, 48V, Dual Output. NMP family complies with safety approval, the medical (2x MOPP between primary to secondary) and ITE standards. Offering the best flexibility for various types of applications.

■ Applications

- Medical equipment
- Diagnostic or biological facilities
- MRI, CT and PET scanners
- Test or measurement systems
- Telecommunication equipment
- Factory automation and aging equipment
- Laser equipment

■ Function Description of CN32

※ Control Pin No. Assignment (CN32) : HRS DF11-6DP-2DS or equivalent

Mating Housing	HRS DF11-6DS or equivalent
Terminal	HRS DF11-6**SC or equivalent

Pin No.	Function	Description
1, 2	+5V-AUX_P	Auxiliary voltage output, 4.5~5.5V, referenced to pin 3 & 4 (GND-P).The maximum load current is 2A (NMP1K2) or 1.5A (NMP650).
3, 4	GND-P	Ground.
5	T-Alarm	TTL signal output for over temperature alarm. The maximum sourcing current is 10mA. High(4.5~5.5V): When the internal temperature exceeds the limit & "safe limit" of temperature alarm. Low(0~0.5V): When the internal temperature is normal.
6	RC1	Turns the output on and off by electrical or dry contact between pin 6 (RC1) and pin 3 & 4 (GND-P). Short: Power ON; Open: Power OFF.

■ MECHANICAL SPECIFICATION

※ NMS-240 Single Output Module

※ Blank slot

Blank slot should be assembled with BLANK-NMS240, Please contact MEAN WELL for details.

※ DC Output Terminal Pin No. Assignment

Assignment	Diagram	Maximum mounting torque	Recommended screw size	MAX. Penetration Depth L

Function Description of CN82(NMD-240)

※ Control Pin No. Assignment (CN82) : HRS DF11-10DP-2DS or equivalent

Mating Housing	HRS DF11-10DS or equivalent
Terminal	HRS DF11-10SC or equivalent

Pin No.	Function	Description
1	GND1	Ground(-V1).
2	GND2	Ground(-V2).
3	RC2	Turns the output V1 on and off by electrical or dry contact between pin 3 (RC2) and pin 1 (GND1). Open: Power ON; Short: Power OFF.
4	RC3	Turns the output V2 on and off by electrical or dry contact between pin 4 (RC3) and pin 2 (GND2). Open: Power ON; Short: Power OFF.
5	DC OK1	"DC OK1" signal is a TTL level, referenced to pin 1 (GND1). Output modules V1 turn on=4.5~5.5V, turn off=0~0.5V. The maximum sourcing current is 10mA (4.5~5.5V).
6	DC OK2	"DC OK2" signal is a TTL level, referenced to pin 2 (GND2). Output modules V2 turn on=4.5~5.5V, turn off=0~0.5V. The maximum sourcing current is 10mA (4.5~5.5V).
7,8,9,10	NC	----

■ Function Manual

1. "Global ON/OFF Control" function is not used

※ The power supply unit will have no output if the shorting connector (accessory comes along with the PSU) is not assembled. It contains one shorting wire: it is from RC1 (CN32 - PIN6) to GND-P (CN32 - PIN3)

2. Global or Local ON/OFF CONTROL

※ The power supply can be turned ON/OFF for the entire unit, by global enable/inhibit, or for specific modules, by local Remote ON-OFF.

☉ Global ON/OFF

Between RC1 (CN32-PIN6) and GND-P (CN32-PIN3)	Output Status
SW1 ON (short)	ON
SW1 OFF (open)	OFF

☉ Local ON/OFF

The NMS-240 can be turned ON/OFF by using the "local ON/OFF" function.

Between RC2 (CN81-PIN3) and GND (CN81-PIN1 or 2)	Output Modules Status (NMS-240)
SW2 OFF (open)	ON
SW2 ON (short)	OFF

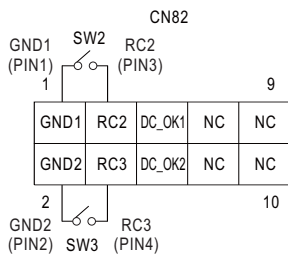

Local ON/OFF

The NMD-240 can be turned ON/OFF by using the "local ON/OFF" function.

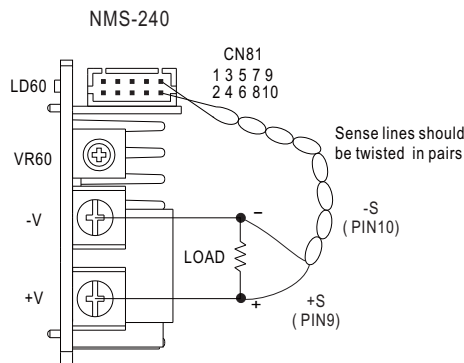

Between RC2 (CN82-PIN3) and GND1 (CN82-PIN1)	Output Modules Status (V1)
SW2 OFF (open)	Output V1 ON
SW2 ON (short)	Output V1 OFF

Between RC3 (CN82-PIN4) and GND1 (CN82-PIN2)	Output Modules Status (V2)
SW3 OFF (open)	Output V2 ON
SW3 ON (short)	Output V2 OFF

3. Remote Sense (NMS-240 only)

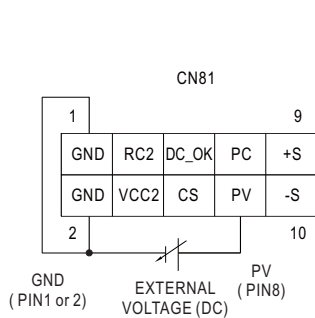

※ The Remote Sense compensates voltage drop on the load wiring up to 0.5V.

4. Output Voltage Programming (PV : NMS-240 only)

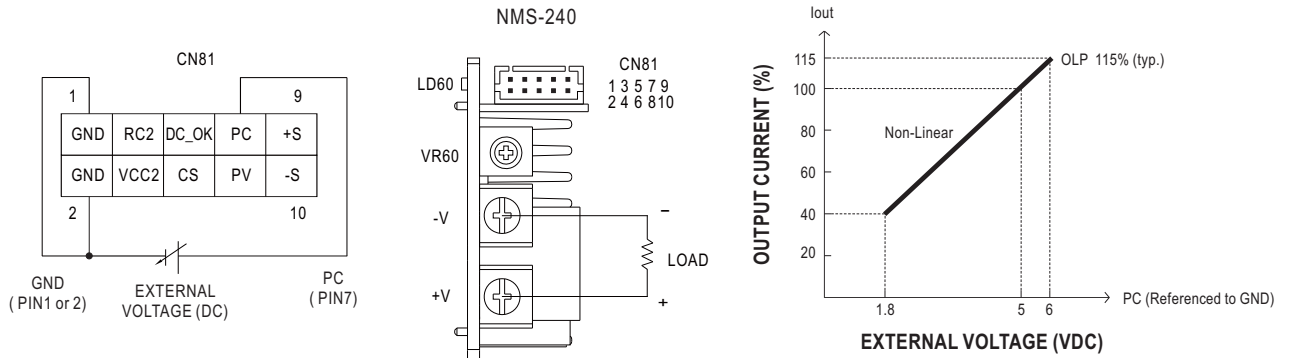

※ In addition to the adjustment via the built-in potentiometer, the output voltage (default voltage set by VR60) can be trimmed by applying "EXTERNAL VOLTAGE".

※ "Output Voltage Programming (PV)" range is the same as "Voltage ADJ. Range (VR60)"

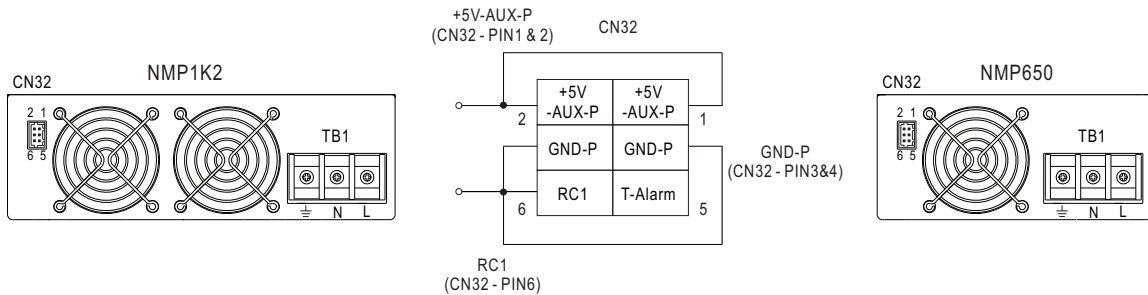

5. Constant Current Level Programming (PC : NMS-240 only)

※ The constant current level can be trimmed to 40~100% of the rated current by applying "EXTERNAL VOLTAGE".

6. Auxiliary Power

※ +5V-Aux_P: Aux. power is 5V/2A (NMP1K2).
Aux. power is 5V/1.5A (NMP650).

※ Vcc2: Aux. Power is 5V/10mA (Output Modules : NMS-240 only)

7. DC OK Signal

"DC OK" signal is a TTL level signal. It indicates the output status of the output modules. "High" when module turns on. The maximum sourcing current is 10mA (4.5~5.5V).

© NMS-240

Between DC OK (PIN5) and GND (PIN1 or 2)	Output Modules Status (NMS-240)
4.5~5.5V	ON
0~0.5V	OFF

© NMD-240

Between DC OK1 (PIN5) and GND1 (PIN1)	Output Modules Status (V1)
4.5~5.5V	Output V1 ON
0~0.5V	Output V1 OFF

Between DC OK2 (PIN6) and GND2 (PIN2)	Output Modules Status (V2)
4.5~5.5V	Output V2 ON
0~0.5V	Output V2 OFF

8. T-Alarm Signal

TTL signal output for over temperature alarm. The maximum sourcing current is 10mA.

Between T-Alarm (CN32 PIN 5) and GND-P (CN32 PIN 3 or 4)	Internal temperature (U702)	Output Status
0~0.5V	The internal temperature is normal.	ON
4.5~5.5V	Exceeds the limit of temperature alarm.	ON
4.5~5.5V	Exceeds the "safe limit" of temperature alarm.	OFF

9. CURRENT SHARING (CS : NMS-240 only)

- Parallel operation is available by connecting the NMS-240 shown as below (CS, GND are connected mutually in parallel).
 - Difference of output voltages among parallel NMS-240 should be less than 0.2V.
 - The total output current must not exceed the value determined by the following equation (Output current at parallel operation)

$$= (\text{The rated current per NMS-240}) \times (\text{Number of NMS-240}) \leq \text{TOTAL output power (NMP650 is 650W max.; NMP1K2 is 1200W max.)}$$
 - In parallel operation 4 or 6 NMS-240 (NMP650 is 4 SLOTS; NMP1K2 is 6 SLOTS) is the maximum, please consult the manufacturer for other applications.
 - The power supplies should be paralleled by using short and large diameter wiring and then connected to the load.
 - In parallel connection, maybe only one NMS-240 (master) operates if the total output load is less than 10% of rated load condition.
 The other NMS-240 (slaves) may go into standby mode.
 - NMS-240 * 6 SLOTS maximum (NMP1K2) \ NMS-240 * 4 SLOTS maximum (NMP650).
 - The short protection of C module (5V) or E module (12V) for current sharing is Hiccup mode or constant current limiting
 - Remote control shall simultaneously turn ON/OFF all power modules that are in parallel. Per the same control logic, LED and DC OK signal of power modules in parallel shall turn ON/OFF simultaneously as well.
 - When power modules are in parallel, output current programmable (PC) function shall NOT be in use.
- ※ Parallel or series connection accessory, please contact MEAN WELL for details.
