

Standard Zip-Lock-Bag Polyethylene 600 pcs. Set

Zip-Lock-Bag clear

Zip-Lock-Bag with marking strips

Zip-Lock-Bags are indispensable products and are used for a wide range of applications! The zip mechanism at the bag opening (marked by a red line) allows the bags to be opened and closed absolutely quietly as well as wear-free. The standard material thickness of 0.05 mm is the optimum thickness for almost all applications and an all-rounder in terms of stability, transparency and flexibility. The plastic bags reliably protect small parts from external environmental influences, dirt and dust. The red line makes it easy to determine which side is open. The variants differ in size and a completely transparent/clear version or with three marking strips. **Keep out of reach of children!**

Technical data: Material: Polyethylene (PE) • Material thickness: 50 µm • Temperature-range: -40°C ... 60°C • Color: Transparent • Content: 600 pcs. per set (6x 100 sizes).
