SIEMENS

Data sheet

6AG1210-1PE28-2AL0

SIPLUS G120 PM240-2 IP20-FSE-A-400V 45 kW based on 6SL3210-1PE28-8AL0 with conformal coating, -20...+50 °C, with integrated class A filter with integrated braking chopper 380-480 V 3 AC +10/-20% 47-63 Hz power high overload: 37 kW at 200% 3 s,150% 57 s,100% 240 s power low overload: 45 kW at 150% 3 s,110% 57 s,100% 240 s 551x 275x 237 (HxWxD), FSE design, degree of protection IP20 without CU and operating unit released as of CU FW version V4.7 HF8

General information		
Product type designation	PM240-2	
Product version	FSE 45 kW	
Design of the converter	FSE	
Protection function		
 Undervoltage protection 	Yes	
 Overvoltage protection 	Yes	
 Overload protection 	Yes	
 Ground-fault protection 	Yes	
Short-circuit protection	Yes	
 Stall protection 	Yes	
 With blocked rotor 	Yes	
 Temperature monitor for motor 	Yes	
 Temperature monitor for converter 	Yes	
 Parameter locking 	Yes	
Input voltage		
Type of input voltage	AC	
Mains filter		
• present	Yes	
 Design of line filter 	Class A	
Input current		
Input current with low overload	86 A	
Input current with high overload	78 A	
output voltage / header		
Output voltage in relation to input voltage, min.	0 %	
Output voltage in relation to input voltage, max.	95 %	
Pulse frequency	4 kHz	
Output current		
Output current, max.	150 A	
Output current without overload	90 A	
Output current with low overload	90 A	
Output current with high overload	75 A	
Power loss		
Power loss, max.	1.201 kW	
Power loss of the CDM in standby mode	32 W	
Power loss of the CDM at the operating point (0/25)	406 W	
Power loss of the CDM at the operating point (0/50)	543 W	
Power loss of the CDM at the operating point (0/100)	955 W	
Power loss of the CDM at the operating point (50/25)	431 W	
Power loss of the CDM at the operating point (50/50)	599 W	

Power loss of the CDM at the operating point (50/100)	1 098 W
Power loss of the CDM at the operating point (90/50)	674 W
Power loss of the CDM at the operating point (90/100)	1 323 W
Relative power loss of the CDM at the operating point (0/25)	0.65 %
Relative power loss of the CDM at the operating point (0/50)	0.87 %
Relative power loss of the CDM at the operating point (0/100)	1.53 %
Relative power loss of the CDM at the operating point (50/25)	0.69 %
Relative power loss of the CDM at the operating point (50/50)	0.96 %
Relative power loss of the CDM at the operating point (50/100)	1.76 %
Relative power loss of the CDM at the operating point (90/50)	1.08 %
Relative power loss of the CDM at the operating point (90/100)	2.12 %
Ratio of converter losses / reference converter losses at the	55.37
operating point (90/100)	
IE class of the CDM	IE2
Power electronics	
emitted active power with low overload	45 kW
emitted active power with high overload	37 kW
active power output with low overload [hp]	60 hp
active power output with high overload [hp]	50 hp
apparent power output	62.4 kVA
Efficiency	0.98
Type of duty cycle duration with low overload	1.1x rated output current (i.e. 110 % overload) for 57 s with a cycle time of 300 s; 1.5x rated output current (i.e. 150 % overload) for 3 s with a cycle time of 300 s
Type of duty cycle duration with high overload	1.5x output current rating (i.e. 150 % overload) for 57 s with a cycle time of 300 s; 2x output current rating (i.e. 200 % overload) for 3 s with a cycle time of 300 s
Cooling method	Internal air cooling
Cooling air flow	0.083 m³/s
Short-time withstand current (SCCR) of the entire control cabinet in accordance with UL 508A	65 kA
Isolation	
Degree of pollution	2 according to EN 61800-5-1
Degree and class of protection	
Degree and class of protection IP degree of protection	IP20
IP degree of protection	IP20 Class I (with protective bonding circuit) and Class III (PELV)
IP degree of protection Equipment protection class according to EN 61800-5-1	Class I (with protective bonding circuit) and Class III (PELV)
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1	
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1	Class I (with protective bonding circuit) and Class III (PELV)
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min.	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation • Storage, min.	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation • Storage, min. • Storage, max.	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation • Storage, min. • Storage, max. • Storage, min. [°F]	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax -25 °C 55 °C -13 °F
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation • Storage, min. • Storage, max. • Storage, min. [°F] • Storage, max. [°F] • Transport, min. [°F] • Transport, max. [°F] Altitude during operation relating to sea level • Installation altitude above sea level without derating, max. Relative humidity • Operation, max. • Condensation permissible	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax -25 °C 55 °C -13 °F 131 °F; Class 1K3 acc. to EN 60721-3-1 -40 °C 70 °C -40 °F 158 °F; Class 2K3 according to EN 60721-3-2
IP degree of protection Equipment protection class according to EN 61800-5-1 Touch protection according to EN 61800-5-1 Standards, approvals, certificates Certificate of suitability Standard for EMC according to EN 61800-3 Ambient conditions Ambient temperature during operation • min. • max. Ambient temperature during storage/transportation • Storage, min. • Storage, max. • Storage, max. • Storage, max. [°F] • Transportation, min. • Transportation, max. • Transport, min. [°F] • Transport, min. [°F] • Transport, min. [°F] • Transport, max. [°F] Altitude during operation relating to sea level • Installation altitude above sea level without derating, max. Relative humidity • Operation, max.	Class I (with protective bonding circuit) and Class III (PELV) Assuming use as prescribed CE / TÜV the EMC product standard EN 61800-3 does not apply directly to a frequency inverter but to a PDS (Power Drive System), which comprises the complete circuitry, motor and cables in addition to the inverter -20 °C; = Tmin 50 °C; = Tmax -25 °C -13 °F 131 °F; Class 1K3 acc. to EN 60721-3-1 -40 °C 70 °C -40 °F 158 °F; Class 2K3 according to EN 60721-3-2

 Vibration frequency with constant acceleration during operation according to EN 60068-2-6, max. 	200 Hz; Constant acceleration = 9.81 m/s² (1 g)
 Vibration frequency with constant deflection during operation according to EN 60068-2-6, min. 	13 Hz
Vibration frequency with constant deflection during operation according to EN 60068-2-6, max.	58 Hz; Constant deflection 0.075 mm
Oscillation frequency during transport in accordance with EN 60721-3-2	Class 2M3
Shock testing	
Shock load during operation	(15x g)/11 ms
Shock acceleration during operation according to EN	147 m/s²
 60068-2-27 Shock acceleration during transport according to EN 60721-3-2 	Class 2M3
Resistance	
Use in stationary industrial systems	
to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
— to chemically active substances according to EN	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity
60721-3-3 — to mechanically active substances according to EN	degree 3); * No
60721-3-3 Usage in industrial process technology	
— Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level
Damark,	LC3 (salt spray) and level LB3 (oil)
Remark — Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and	* The supplied plug covers must remain in place over the unused interfaces during operation!
ANSI/ISA-71.04	during operations
Conformal coating	
 Coatings for printed circuit board assemblies acc. to EN 61086 	Yes; Class 2 for high reliability
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
 Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC- CC-830A 	Yes; Conformal coating, Class A
Cables	
Cable length for motor, shielded, max.	200 m
Cable length for braking resistor, max.	10 m
connection method	
Design of electrical connection of motor	Screw terminals
 connectable cable cross-section for motor supply line, min. 	25 mm²
 connectable cable cross-section for motor supply line, max. 	70 mm²
 Connectable conductor cross-section for AWG cables, min. 	4
Type of electrical connection for mains supply line	Screw terminals
 connectable cable cross-section for mains supply line, min. 	25 mm²
 connectable cable cross-section for mains supply line, max. 	70 mm²
Connectable conductor cross-section for AWG cables, min.	4
Type of electrical connection for supply cable to braking resistor	Screw terminals
 Connectable cable cross-section for supply cable to braking resistor, min. 	10 mm²
 Connectable cable cross-section for supply cable to braking resistor, max. 	35 mm²
Connectable conductor cross-section for AWG cables, min.	8
 Connectable conductor cross-section for AWG cables, max. 	2
Design of electrical connection for the PE conductor	Screw terminals
Dimensions	
Width	275 mm

Height	551 mm
Depth	237 mm
Weights	
Weight (without packaging)	28 kg
Other	
Sound pressure level (1 m), max.	70.6 dB
Brake design	DC braking, compound braking, resistance braking with integrated brake chopper (for size FSGX optional)
