

Cable-Tie Set 30...10 cm incl. Adhesive-Sockets Item-No.: 23CA238 ... 23CA243

It is impossible to imagine today's world of technology, electronics and mechanics without disposable plastic cable ties. As an inexpensive and reliable connecting and bundling element, the applications go far beyond fixing and bundling cables and cable harnesses! Made of high-purity polyamide, these are very stable and withstand even harsh environments, moisture or UV exposure. The practical combination sets are supplemented by adhesive bases with 3M adhesive, so that they can be used on smooth surfaces.

Caution: the surfaces must be clean and dry in order to develop the full adhesive power. After approx. 1.5 hours a basic strength is reached, after max. 24 hours the final strength on the respective surface is reached. Cable ties are not suitable for children and should only be used by skilled personnel.
