

A versatile and state-of-the-art tester, the DBT 500 6/12 V has been designed to cater to all starter battery, starter motor and alternator testing applications. Accurate and reliable, it provides the correct diagnosis with an intuitive colour display, 3 different test types, and graphical presentation function.

COMPREHENSIVE TESTING FUNCTIONALITY

6 and 12 V Battery Test:

- Voltage and state-of-charge test.

6 and 12 V Starter:

- Start-up voltage test.

12 V Alternator:

- No-load and under-load voltage test, and under-load current ripple test.

Waveform

This function, which is accessible directly via a designated button, provides a graphical analysis of the battery voltage during start-up. This provides an excellent indication of the health of the battery.

VERSATILE

- Compatible with 3 types of lead-acid battery, ranging from 7 to 240 Ah:
 - Sealed batteries VRLA / GEL / AGM FLAT PLATE / AGM SPIRAL
 - STANDARD LIQUID batteries
 - START / STOP batteries (EFB/AGM)

Working range:

FR	DIN	SAE	JIS	IEC	CA/MCA
				international standard	marine battery
100 > 2000 A	100 > 1400 A	100 > 2000 A	26A17 > 245H2	100 > 1400 A	100 > 2000 A

HIGHLY ACCURATE

- Automatic external temperature compensation.
- Dynamic resistance measurement minimises battery discharge and gives a reliable result that is not influenced by:
 - surface charge
 - parasitic load (lights, various indicators, etc)
 - contact imperfections (oxidation of terminals/ lugs, unfastened lugs, etc)

INTUITIVE & SAFE

- 2.4-inch colour screen.
- Graphical battery voltage check.
- Test results are uploadable, so they can be saved electronically.
- Reverse polarity protection.

Interface available in 12 languages

		TEST			RESULT		TEMPERATURE COMPENSATION	mm		kg
