

TECHNICAL DATA SHEET

SECUMAX PLASTICUT NO. 346922

Safety technology

Concealed blade – a maximum degree of safety

The SECUMAX PLASTICUT blade is not an open one, but is hidden from people and goods. This provides you with the highest degree of safety from cut injuries and from damage to goods.

DISPOSABLE SAFETY KNIFE WITH CONCEALED BLADE, ESPECIALLY FOR CUTTING ALL TYPES OF FOIL.

Order No. 346922.16

Capable of cutting multiple layers.

The SECUMAX PLASTICUT is different from the other products in our range, but only in the detail. But that's what often matters the most. Thanks to a large gap between the blade and the plastic, the safety knife can, for example, cut through multiple layers of film and paper. With a thickness of 3 mm, curved cuts in narrow spaces are also possible. The concealed blade is made of stainless steel, the cutting edge is TiN-coated.

It's all protected

The quality blade is safely embedded between the nose and the handle. So it only cuts what you really want to cut. And there is no risk to your goods while doing so.

Nose for piercing

You will not put away the SECUMAX PLASTICUT so easily. That's because it is comfortable, light and handy. It has a slightly raised and pointed nose and is therefore ideal for piercing into the material to be cut.

Stainless steel blade

Not all film knives are equipped with rust-free blades. The SECUMAX PLASTICUT is an exception. What's more: its cutting edge is TiN-coated as well. Both aspects increase the value and durability of your cutting tool.

Singularly good

The SECUMAX PLASTICUT is a disposable knife. Since you do not have to change the blade, neither you nor your staff can come into contact with it. An additional benefit as far as safety is concerned.

Ideally placed

You won't misplace the SECUMAX PLASTICUT so easily. The safety knife is equipped with an eyelet so it can be kept in an easy to find place.

PRODUCT FEATURES

Technical features

	Maximum safety		Disposable knife		Ergonomic		Cutting depth
	For right and left handers		Stainless		TiN-coated		Lanyard hole
	Printable for promotional purposes						

Main cutting materials

	Wrapping, stretch and shrink foil		Tape		Layers of foil or paper		Yarn, cord

SAFETY ADVICE

To ensure that you use your new MARTOR knife safely and most effectively, please read and note the following user-instructions. Please keep the written guide in a safe place so that you can access it at any time. As an additional safety measure, we recommend wearing cut-resistant gloves.

1. Usage advice: Please use the product carefully for described work only and not for any purposes other than those that are intended. Please take the correct handling and the proper use of the cutting tool into account in this regard.

2. Special application Instructions to avoid the danger of injuries: Only use cutting tools that are in perfect condition and have sharp, clean and undamaged blades. Employ the utmost care when handling the knives. **CAUTION: The blade is sharp and can result in serious and deep cuts. Therefore, never reach into the blade!** To reduce the danger of injuries,

hold the hand that is being used to restrain and stabilise the cutting base in such a manner that the restraining hand or even other body parts are not endangered in the event that the knife slips. Do not modify this product in any way. Modifications of any kind may impair product safety. **CAUTION:** The risk of injury caused by manipulation of this product is extremely high. When both cutting edges are no longer sharp, dispose of the knife as general waste.

3. Non-use of the knife: Store the knife in a secure place.

4. Care instructions: Always keep the knife clean and do not expose it to unnecessary humidity to safeguard a long service life.

CAUTION: No liability will be assumed for consequential losses. Subject to technical changes and errors! This knife does not belong in the hands of children!
