

RACON 8, SMT, 4.8 ± 0.8 N, 1 NO

fields of application

- > Measurement-control-regulation
- > Mechanical and system engineering
- > Automotive
- > Electro-medical

special features

- > Gold contacts, reliable switching with low currents
- > Special tactile feedback
- > Different operating forces
- > Variable overall heights due to plunger
- > Terminal technology: SMT or THT
- > Traceability through product identification

CE

description

Our top-quality RACON 8 tactile switches – in dimensions 8.4 x 8.4 mm – feature an unmistakeable click, high switching reliability, and a sealed contact system. That has made RACON the standard in many industries. Whether for automotive applications, systems with keycaps, or membrane keyboards, RACON impresses in the THT or SMT versions – for your application too.

RACON 8 tactile switches can be arranged individually, in rows or as key blocks. When used beneath membrane overlays, the RACON key switches should be combined with plungers. Suitable for the most important soldering techniques.

- > Soldering bath for THT versions
- > Reflow soldering for SMT versions
- > Vapor phase soldering for SMT versions
- Manual soldering
- > Processing of the SMT designs with SMT automatic assembly machines
- > IMDS entry

RAFI soldering profile for ROHS compliant reflow components

Publication date: October 7, 2021

Parameter	RAFI values	
Gradient (T _L to T _P)	max. 3°C / s	
Preheating zone Minimum temperature (T _{smin}) Maximum temperature (T _{smax}) Time (from min. to max.) (ts)	150°C 200°C 60 - 120 s	
Gradient (T _{smax} to T _L)	max. 3°C / s	
Time over melting temperature (T _L) time (t _L)	217°C 60 – 150 s	
Peak temperature (T _P)	max. 260°C (+0°C)	
Time within peak temperature – 5°C (tp)	20-40 s	
Gradient ramp down	max. 6°C/s	
Time difference from 25°C to peak temperature	max. 8 minutes	

The reflow soldering profile is based on the definition of Jedec J-STD-020D.

The information in this sheet only contains general descriptions and / or performance features, which may not apply precisely as described to the respective application, and which my change due to further product enhancements. The technical data, illustrations and other information about our products are the mere results of individual technical testing. These descriptions and other product features are only binding if they expressly agreed upon at the time of the conclusion of a binding contract. In all other cases, we reserve the right to make technical changes as well as changes of availability. Pictures and other graphic illustrations are approximations only. All product names may be trademarks or brand names of the RAFI Group or any other sub-supplier of RAFI. The use of such by any third parties for their own purposes may infringe the rights of the respective entity holding those rights. Subject to change and errors excepted. Details about delivery times and availability are noncommittal and have no legal force.

Medium Robust Electronics

Publication date: July 25, 2022

RACON 8

Valid for all variants RACON 8, 1.14.100.5XX-9XX

Approved potting compounds

WEVO-CHEMIE GmbH
 WEVOPUR 7210 FL/WEVONAT 507
 WEVOPUR PD4431 FL/WEVONAT 300

• STOCKMAIER URETHANES GmbH & Co.KG Stobicast® L768.16 Polyol/Isocyanat

Important note

Maximum potting height B must not be exceeded.

Approved circuit board protection

Important note

If the tactile switch is completely painted, the paint may peel off the elastomer of the tactile switch during the first few actuations. Press the tactile switch only after the paint has hardened.

We recommend leaving out the elastomer area when painting to prevent detachment.

TIEFCO Coating Company
 3M[™] Novec[™] 1700

Important note

After coating, the contact resistance can increase. After repeated actuation, the contact resistance drops again under 100 m Ω .

General remark:

The potting, varnish and nano medium must be used in accordance with the manufacturer's technical data sheet. Actuation of the tactile switch only after the potting compound, varnish and nano medium has hardened.

Other potting compounds and processes for printed circuit board protection on request.

The information in this sheet only contains general descriptions and / or performance features, which may not apply precisely as described to the respective application, and which my change due to further product enhancements. The technical data, illustrations and other information about our products are the mere results of individual technical testing.
