description

Our top-quality RACON 12 tactile switches - in the dimensions 12 x 12 mm - feature an unmistakeable click, high switching reliability, a sealed contact system and castability. That has made RACON the standard in many industries. Whether for automotive applications, systems with keycaps, or membrane keyboards, RACON impresses in the THT or SMT versions - for your application too.

RACON 12 tactile switches can be arranged individually, in rows or as key blocks. When used beneath membrane overlays, the RACON key switches should be combined with plungers. Suitable for the most important soldering techniques.

Important note

Maximum potting height B must not be exceeded.

Approved circuit board protection

Lackwerke Peters GmbH & Co.KG ELPEGUARD[®] SL 1307

Important note

If the tactile switch is completely painted, the paint may peel off the elastomer of the tactile switch during the first few actuations. Press the tactile switch only after the paint has hardened. We recommend leaving out the elastomer area when painting to prevent detachment.

• TIEFCO Coating Company

3M[™] Novec[™] 1700

Stobicast® L768.16 Polyol/Isocyanat

Important note

After coating, the contact resistance can increase. After repeated actuation, the contact resistance drops again under 100 m $\!\Omega$

General remark:

The potting, varnish and nano medium must be used in accordance with the manufacturer's technical data sheet. Actuation of the tactile switch only after the potting compound, varnish and nano medium has hardened.

Other potting compounds and processes for printed circuit board protection on request.
