

E-BOX M12, emergency stop, illuminated pushbutton, 2 NC + 1 NO, Gold, M12 8-pin A-coded, reset by rotating, Mushroom head red, bezel green, illuminable

fields of application

- › Measurement-control-regulation
- › Mechanical and system engineering
- › Construction machinery
- › Industrial robots
- › Model construction
- › Home technology

special features

- › Compact dimensions: 109 x 40 x 27 mm
- › Various actuator-indicator combinations from the RAFIX 22 FS+ control unit series
- › With yellow upper part of housing for combinations with emergency stop actuator
- › With gray upper part of housing for pushbutton combinations
- › Mounting with time-saving single-hole screw mounting technology, particularly suitable for aluminum profile rails or alternatively direct mounting with M4 screws
- › Connection with M12 plug: "Plug and Play"

description

The E-Box M12 is a ready-to-connect, completely equipped housing including actuator and switching elements. Thus, for example, emergency stop, on/off and up/down functions, also with additional status displays, can be implemented with the very compact dimensions of the E-Box. The assembly: Screw on the clip, put on the box, connect the plug, check and ready. The E-Box M12 can be used wherever individual command device units are required at decentralized locations. Typically, for example, for emergency stop applications along a production facility or at the safety fence. The dimensions of the E-Box M12 are based on the edge dimensions of a 40 mm profile rail and the mounting concept is also designed for this.
