

HiRise Pro for iMac & Displays

HiRise Pro is a beautiful modern stand that elevates your iMac, Studio Display, or external display to a more optimal viewing height. Four height settings mean you can elevate your display to a customized ergonomic viewing height for added comfort while you work.

The all metal HiRise Pro also provides convenient storage for hubs, hard drives, or your keys & wallet. A quick access magnetic front door allows you to quickly and easily stash and retrieve items when needed.

Visually, the silver finish pairs nicely with silver iMacs and the Apple Studio Display. To better complement your work area, the stand's reversible magnetic grille can be flipped to show a modern all metal front or a beautiful walnut veneer. As an added touch of elegance, HiRise is topped with a supple black leather valet tray to hold your iPhone, keys or glasses.

Key facts:

- Elevates iMac or display to your optimal viewing height
- Creates hidden desktop storage for hard drives, hubs or personal items
- Features a reversible walnut / aluminum front plate and padded leather top
- Internal shelf adjusts to four different screen height options
- Works with all iMacs and most displays
