Individual protection measures, such as personal protective equipment

**Respiratory protection:** Not required.

**Hand protection:** The glove material has to be impermeable and resistant to the product/the substance/the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.  
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

**Material of gloves:** The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.  
As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

**Penetration time of glove material:** The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**Eye/face protection:** Goggles recommended during refilling

**Body protection:** Protective work clothing

**Thermal hazards:** Not required for normal conditions of use.

**Environmental exposure controls:** Control measures must be made in accordance with community environmental protection legislation.
