- **Free technical support and standards alignment**
- **Secure cloud-based certification on the Microsoft™ Azure™ platform**
- **Simultaneous job access for multiple users (licence required per user)**

DESCRIPTION

Megger CertSuite™ is the latest generation of electrical certification software. The cloud based system can be used on both Android or iOS smartphones and tablets as well as most browsers, allowing use on both laptops and desktops.

CertSuite is a subscription based software package offering either annual or monthly subscriptions.

Why choose Megger CertSuite™ ?

CertSuite offers a secure, cloud based software solution for the creation, printing and storage of professional certificates and reports. The system is fully compliant and maintained to the latest amendments of BS7671.

CertSuite works online and offline. When working online, data and test results are seamlessly synchronised to the cloud. While offline, data and test results can be added to the system at any time, and automatically uploaded to the cloud as soon as an internet connection becomes available. Customer and site data can be pre-loaded reducing time on-site and different members of your team can access and upload to the same job at the same time.

Head office can also access the same jobs, allowing pre-completion of customer data, but also to discuss or give feedback whilst electricians are still on site.

TIME SAVING FEATURES

- Duplicate jobs, distribution boards and circuits to save repetitive work
- Built-in circuit templates make creating boards quick and easy
- Many default options for circuits, inspection schedule items etc.

Accurate:
- Automatically generates observations if Max Zs is exceeded
- Automatically cross references observations and inspection schedules
- Comprehensive database of standard observations

Creative:
- Includes digital photographs to illustrate observations
- Constantly being updated and improved
- Customer feedback is welcomed and used.

Megger CertSuite™
Electrical Certification Software

CertSuite offers many advantages over traditional hand written documentation, including:

- Access from Android and Apple smartphones or tablets using freely downloadable apps from the Google Play® or Apple® App Store platform.

- Also compatible with Chrome, Microsoft Edge, Firefox, Safari and Opera web browsers.
