

Multifunction Wire Stripper Item-No.: 23T059

The wire stripper has a removable blade unit for applications between 0.2 and 8 mm² cable cross-section. A fixed or recurring stripping length can be preset using the rotary knob, which fixes the limiter in the desired position. The ergonomic handle sits comfortably in the hand and provides a good grip. The low weight is ideal for prolonged use and prevents fatigue.

In addition to stripping, the pliers have clever additional functions and can offer the following functions thanks to the special cut-outs in the handle:

- Cutter for cutting small wires and cables (removable blade)
- Crimping pliers function for non-insulated terminals 0.5 - 6 mm²
- Crimping pliers function for insulated terminals 0.5 - 6 mm²

Technical Specifications

Size: appx. 185 x 135 x 30 mm • Weight: 310 g • Material: tool steel, handle plastics • Stripping function for cable, cross section: 24 ... 8 AWG / 0.2 ... 8 mm² • Wire cutter function for copper and aluminum wires • Crimping function for terminals (uninsulated) 22 ... 10 AWG / 0.5 ... 6 mm² • Crimping function for terminals (insulated) 22 ... 10 AWG / 0.5 ... 6 mm².

Application by qualified electricians only.
