

Data Sheet

3.7 V lithium battery charging protection board module

Technical data

Size :30 * 3 * 1.0 mm

Overcharge detection voltage : 4.25 ± 0.05 V

Overcharge release voltage : 4.23 ± 0.05 V

Over-discharge voltage detection voltage : 2.54 ± 0.1 V

Overcurrent detection current :1 – 3 A

Function

overcharge protection function, over-discharge protection functions short circuit protection function, overcurrent protection function

Wiring instructions.

B+ Connects to the positive battery terminal

B- Connects to the negative battery terminal

P+ indicates the positive terminal of the battery output and input

P- indicates the negative terminal of the battery output and input
