The 1S7B_6U series meet basic insulation grid supplied circuits from earthed exposed parts and is thus vital for safety. It is specially designed for applications which require compact size, high isolation, low isolation capacitor and low leakage current power.

These products apply to:

- 1) Where the voltage of the input power supply is fixed (voltage variation $\leq \pm 10\%$)
- 2) Where isolation is necessary between input and output (isolation voltage $\leq 6000\text{VDC}$)
- 3) Where do not has high requirement of line regulation and the ripple & noise of the output voltage;

Such as: Medical collection and isolation, High voltage collection circuit, IGBT-driven circuits, etc.
