

Fine Pitch Stacking Connectors (Parallel Board-to-Board)

RoHS
Ready 

0.4mm Fine Stack Connectors (Pages 7 thru 11)

- 0.4mm contact pitch
- 1.0mm and 1.5mm stacking height
- 20 to 90 positions

0.5mm Fine Stack Connectors (Pages 13 thru 16)

- 0.5mm contact pitch
- 1.5mm stacking height
- 20 to 80 positions

0.5mm Fine Mate Connectors (Pages 13 and 16 thru 18)

- 0.5mm contact pitch
- 4.0 to 6.0mm stacking heights
- 16 to 100 positions
- Right angle options

0.5mm Free Height (FH) Connectors (Pages 19 thru 25)

- 0.5mm contact pitch
- 5.0 to 16mm stacking heights
- 120 to 440 positions

0.6mm Free Height (FH) Connectors (Pages 27 thru 40)

- 0.6mm contact pitch
- 4.0 to 16mm stacking heights
- 50 to 320 positions
- Grounded (GIGA) versions

MICTOR Connectors (Pages 41 thru 62)

- 0.635 [.025] contact pitch
- 6.6 to 22.86 [.260 to .900] stacking heights
- 38 to 266 positions
- Matched impedance

0.8mm Fine Stack Connectors (Pages 63 thru 67)

- 0.8mm contact pitch
- 3.0mm stacking height
- 14 to 50 positions

0.8mm Fine Mate Connectors (Pages 63, 68 and 69)

- 0.8mm contact pitch
- 4.0 and 4.5mm stacking heights
- 10 to 60 positions

0.8mm Free Height (FH) Connectors (Pages 71 thru 81)

- 0.8mm contact pitch
- 5.0 to 16mm stacking heights
- 40 to 200 positions

1.0mm FH (IEEE 1386) Connectors (Pages 83 thru 88)

- 1.0mm contact pitch
- 8.0 to 15mm stacking heights
- 64 and 84 positions

AMPMODU 50/50 Grid Connectors (Pages 89 thru 99)

- 1.27 [.050] contact pitch
- 6.35 [.250], 8.13 [.320] and 9.91 [.390] stacking heights
- 10 to 100 positions

AMPMODU System 50 Connectors (Pages 101 thru 104)

- 1.27 [.050] contact pitch
- 13.08 [.515] stacking height
- 10 to 100 positions

Note: A complete stacking height guide for parallel board-to-board applications of all fine pitch connectors presented in this catalog is shown on foldout pages 3 and 4.

High Speed Stacking Connectors (See Catalog 69194)	

Introduction

TE Connectivity is the leading global supplier of solutions to interconnect high density, parallel printed circuit boards using fine pitch SMT stacking connectors. This catalog includes products available worldwide to connect parallel printed circuit boards using SMT connectors with contact spacings of 1.27 [.050] or less.

This catalog serves as a guide to assist in the selection of high density connectors which fit variable heights between printed circuit boards. A guide for board-to-board stacking heights is provided on fold-out pages 3 and 4 to assist in the connector selection process.

All fine pitch SMT connectors referenced are ideally suited for applications requiring miniaturization

such as telecommunications and networking equipment, desktop and notebook personal computers, personal digital assistants, cellular phones, pagers, camcorders and other consumer electronics.

All connectors presented in this catalog are designed with precise tolerances and features to meet the requirements of modern, automated SMT printed circuit board assembly operations that rely on machine placement and reflow soldering.

These connectors are available with surface areas to accommodate "pick and place" vacuum nozzles. Some products require an optional secondary cover, while others have the surface area integral to the housing. Housings are in configurations and made of

materials to withstand the high temperatures required for solder reflow.

Many of the connectors are available in EIA standard "tape and reel" packaging, or in trays for high volume production.

These connectors are designed to continue to provide high performance and reliable service after processing. And, as with all TE products, they are supported by a wealth of services unmatched by any other supplier.

For more information about these and other products, as well as the many services TE can provide, consult your local sales engineer or call our Product Information Center at the numbers listed below.

Restriction on the use of Hazardous Substances (RoHS)

At TE, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

RoHS Compliant — Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change.

For latest compliance status, refer to our website referenced at right.

Need more information?

Call Technical Support at the numbers listed below.

Technical Support is staffed with specialists well versed in TE products. They can provide you with:

- Technical support
- Catalogs
- Technical Documents
- Product Samples
- Authorized Distributor Locations

Dimensioning:

Dimensions are in millimeters and inches unless specified otherwise. Values in brackets are equivalent U.S. customary units.

Metric symbols used are:

- mm (millimeter)
- C (Celsius)
- N (newton)

Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above
- So whatever your questions when it comes to RoHS, we have the answers at www.te.com/leadfree

0.4mm Fine Stack Connectors

Product Facts

- All 0.4mm Fine Stack products in this section are RoHS compliant
- Ultra low stacking height 1.0mm and 1.5mm
- Contact system allows for large mating tolerances $\pm 0.4\text{mm}$ in X-Y direction
- The separated contact point prevents the contact to be damaged by flux and solder
- 0.3A, 30VAC
- Versions planned for 12 through 80 positions
- One action distinct audible locking clip

Technical Documents

Product 108-5901

This Board to Board connector has been developed especially for LCD to board applications, where one side of the FPC connector will be soldered to the FPC and the other side will be

mounted on the PCB. By applying this connection style a major board space reduction can be obtained, compared with the traditional FPC / Board to Board connectors.

0.4mm Fine Stack Receptacles, 0.4 [.016] Pitch

Engineering Notes

0.5mm Fine Stack and Fine Mate Connectors

Product Facts

- Ultra fine, 0.5 [.020] pitch SMT connectors for board-to-board interconnections
- Low profile parallel board stacking heights as low as 1.5 [.059]
- Horizontal versions available for right angle board-to-board applications
- Surface areas provided to accommodate vacuum nozzles
- Available packaged in tape and reel for automatic placement per EIAJ standards
- Offered with tin or gold plating on mating surfaces
- Solder pegs are included for anti-peeling

Note: Fine Stack connectors are shown at the bottom; Fine Mate connectors are shown on top.

The TE 0.5mm Fine Stack and Fine Mate product lines are economical, surface-mount, ultra-fine pitch board-to-board connectors. Both product lines have been developed to meet the latest needs of the electronic industry for high density packaging.

These connectors offer a 0.5 [.020] contact pitch and parallel board stacking heights as low as 1.5 [.059] for Fine Stack connectors and ranging from 4.5 [.177] to 6.0 [.236] for Fine Mate connectors. They are ideally suited for applications requiring miniaturization, such as cellular phones, pagers, notebook computers, camcorders and other consumer electronics.

Both Fine Stack and Fine Mate connectors were designed for economical, automatic placement onto SMT printed circuit boards. The tab and receptacle designs include surface areas to accommodate "pick and place" vacuum nozzles without secondary covers. All products are "tape and reel" packaged, conforming to EIAJ standards.

0.5mm Fine Stack Receptacles, 0.5 [.020] Pitch

1.5mm [.059"] Stacking Height

Material and Finish

Housing — 6T nylon, high heat resistant resin

Contacts — Phosphor bronze, plated gold over nickel

Solder Pegs — Copper alloy, plated tin

0.5mm Free Height (FH) Connectors

Product Facts

- Available position sizes:
 - For single connector: 120, 160, 200, 220, and 240 positions
 - For bridged connectors: 240, 320, and 440 positions
- Available stacking heights:
 - 5mm, 6mm, 7mm, 8mm, 9mm, 11mm, 12mm, 15mm, and 16mm (limited by position sizes)
- Giga ground shielding options on all parts
- RoHS Compliant part numbers available
- Polarized locating posts

0.5mm Free Height is a two-piece connector system designed for parallel board-to-board stacking applications. The contact system is identical to our popular 0.6mm FH product. The 0.5mm FH product has been chosen by the PICMG COM Express working group as the interface between embedded modules and carrier cards.

Applications

Parallel board-to-board for stacking applications that require high density. **The .5mm FH product is specified by the PICMG COM Express standard as the module to carrier card interface.** All stacking applications including Computer, Telecommunications, and Industrial industries.

Mechanical Properties

Operating Temperature — -40°C to +85°C
Durability — 30 cycles
Current Rating — 0.5A
Voltage Rating — 50 VAC
Dielectric Withstanding Voltage — 200 VAC

Engineering Notes

0.6mm Free Height (FH) and GIGA Connectors

Product Facts

- 0.6 [.024] pitch SMT connectors for parallel board stacking
- Connector sizes ranging from 50 to 280 positions
- Solder pegs included for anti-peeling
- Available packaged on "tape-and-reel" for automatic placement per EIA standards
- Surface areas provided to accommodate vacuum nozzles
- Enhanced electrical performance grounded version (GIGA) available for high speed signals
- Recognized under the Component Program of Underwriter Laboratories Inc., File No. E28476 

TE 0.6mm Free Height (FH) and GIGA connectors are designed for use in the parallel stacking of printed circuit boards. These 0.6 [.024] fine pitch connectors provide the capability of varying the spacing between parallel boards, depending upon the components to be packaged or equipment designs. They are best suited for applications where miniaturization is essential, such as notebook PCs, sub-notebook PCs, pen pads, cellular phones and communication equipment.

This connector family consists of vertical board-mount receptacles and plug assemblies. By using various combinations of plug and receptacle heights, it is possible to alter the spacing of parallel boards between 4 [.157] and 16 [.630].

The enhanced electrical performance version (GIGA) includes receptacles loaded with contacts for grounding circuits at every 9 or 10 signal circuits. These ground contacts mate with grounding plates on both sides of the plug assemblies.

0.6mm FH and GIGA connectors are packaged in trays or on "tape-and-reel" for high volume production. Each connector half features surface areas to accommodate "pick-and-place" vacuum nozzles without secondary covers. Some connector sizes are available packaged in a unique "bridge" to facilitate the aligning of dual connectors on PC boards during placement and SMT processing.

Performance Characteristics

Voltage Rating — 50 VAC

Current Rating — 0.5 ampere

Overall Resistance —
less than 30 milliohms

Dielectric Withstanding Voltage —
0.2 kVAC

Operating Temperature —
-40°C to +85°C

0.6mm Free Height GIGA Plugs, 0.6 [.024] Pitch

4H (4mm), 5H (5mm),
6H (6mm), 7H (7mm),
8H (8mm) and 12H (12mm)

Note: All GIGA plugs include ground plates that mate with receptacles with common ground contacts..

Material and Finish

Housing — High temperature thermoplastic, 94V-0 rated

Contacts — Copper alloy; duplex plated 0.00020 [.000008] min. gold on contact area, 0.00100 [.000039] min. tin on solder area, with entire contact underplated 0.00130 [.000051] min. nickel

Ground Plates — Phosphor bronze, plated 0.00300-0.00500 [.000120-.000200] tin over 0.00050 [.000020] copper

Introduction to the MICTOR Interconnection System (0.64 [.025] Centerline)

Product Facts

- 76 dedicated signal lines per linear inch
- Surface mount family designed for parallel and right angle board-to-board, flex-to-board and cable-to-board configurations
- 0.64 [.025] centerline contact spacing
- Redundant interfaces on mated contacts
- Fifteen mated stack heights available ranging from 6.60 [.260] to 31.90 [1.256]
- Infrared and forced air convection compatible housing materials
- Designed for 50-ohm systems
- Connector housings polarized for correct mating
- Built-in connector-to-board retention feature
- Connector can be separated by peeling from one end to the other
- Various packaging styles can be made available for automated assembly (tape and reel, tubes)
- Recognized under the Component Program of Underwriter Laboratories Inc.  File No. E28476

The MICTOR connector family is based on the microstrip concept of two rows of signal contacts divided by a center power ground plane. MICTOR connectors are motherboard and daughtercard compatible and include designs for cable-to-board applications.

Various mated heights are available for parallel board-to-board systems. Custom stacking heights can be provided. The MICTOR

connector family is available in 0.64 [.025] centerlines and in sizes ranging from 38 signal positions to 266 positions (in increments of 38 positions). There is a discrete ground bus every 12.7 [.50] of the connector length, which can be assigned to either power or ground in any combination.

Redundant interfaces on every signal line provide added reliability. Two plating options are available to

meet the needs of various applications.

The housing material is a liquid crystal polymer, compatible with infrared and forced air convection operations.

The connector system uses the solid ground bus between the rows of signals to provide low crosstalk and excellent high-speed signal characteristics.

MICTOR Connector Cross Section

Connectors are shown at point where signal contact first touch each other.
Connectors are designed to be fully mated when the two "Z" datums meet.

Material and Performance Specifications, MICTOR Connectors

Material Specifications

Material

Housing — Liquid crystal polymer, black

Contacts — High reliability copper alloy

Ground Bus — Phosphor bronze

Finish (Gold Plating)

Contacts and Ground Bus — 0.00076 [.000030] min. gold on contact area, 0.00381-0.00635 [.000150-.000250] matte tin per ASTM B 545 on leads, all over 0.00177-0.00445 [.000070-.000175] nickel.

Finish (Palladium-Nickel Plating)

Contacts and Ground Bus — 0.00013 [.000005] min. gold over, 0.00076 [.000030] min. palladium nickel on contact area, 0.00381-0.00635 [.000150-.000250] matte tin per ASTM B 545 on leads, all over 0.00191-0.00445 [.000075-.000175] nickel.

Performance Specifications

Ratings

Voltage — 30 vac

Current — Signal; rated 1.0 Amps, fully derated 0.5 Amps
Ground; rated 11.5 Amps, fully derated 7.6 Amps

Temperature — -55°C to +125°C

Electrical Characteristics

Characteristic Impedance — 50±5 ohms at 1 ns

Termination Resistance — ΔR 10 milliohms max.; AMP Specification 109-6-1

Insulation Resistance — 10,000 megohms min.; AMP Specification 109-208-1

Dielectric Withstanding Voltage — 500 vac at sea level; AMP Specification 109-29-1

Mechanical Characteristics

Solderability — Solderable area shall have a 95% min. solder coverage; AMP Specification 109-11-1

Vibration (Random) — No discontinuities of 1μs or longer duration; AMP Specification 109-21-5

Physical Shock — No discontinuities of 1μs or longer duration; AMP Specification 109-26-1

Durability (Tested to) — Mate and unmate samples at a rate of 600 cycles max. per hour. 25 cycles, gold plating; 500 cycles, palladium-nickel plating; AMP Specification 109-27

Contact Retention — 1 lb min.; AMP Specification 109-30

Mating Force — 152 oz max. per 1/2 inch of connector (1 module). Each module equals 38 signal contacts and 1 ground bus; AMP Specification 109-42

Unmating Force — 19 oz min. per 1/2 inch of connector (1 module). Each module equals 38 signal contacts and 1 ground bus; AMP Specification 109-42

Environmental Characteristics

Thermal Shock — Subject mated samples to 5 cycles between -55°C and +125°C; AMP Specification 109-22

Humidity - Temperature Cycling — Subject mated samples to 10 cycles between +25°C and +65°C at 95% RH; AMP Specification 109-23-3, Condition B

Temperature Cycling — Subject mated samples to 1024 cycles between -40°C and +60°C at 2 hours per cycle; AMP Specification 109-75-1

Temperature Life — Subject mated samples to temperature life at +118°C for 792 hours; AMP Specification 109-43

Mixed Flowing Gas — Subject mated samples to environmental class II for 14 days; AMP Specification 109-85-2

MICTOR Right Angle (Straddle Mount) Combinations

30μ Gold & Palladium Nickel Connections

Vertical Receptacle with
Right Angle Plug

Vertical Plug with
Right Angle Receptacle

Right angle versions are designed for paddlecard type applications. It is highly recommended that customers who are considering right angle applications

contact TE Engineering to review their applications as the potential for tolerancing issues and/or issues of solder joint integrity can be highly application specific.

Application Tooling for MICTOR Right Angle Connectors

Two operations must be performed so that the MICTOR right angle connector can be successfully installed on a PC board. First, the board must be slit for the ground/bus bar. At the customer's option, this operation may be done at the time of board manufacture. Second, the right angle connector must be properly placed on the board.

TE offers bench-mount tooling for slitting the PC board (see below) and a free-standing tool for installing the connector (shown at the right). AMP Application Specification No. 114-11004 and Instruction Sheets are available to provide the necessary instructions and recommendations for proper tool use.

Application Specification No. 114-13008 for Right Angle.

Application Tool Number 767511-1
(Instruction Sheet No. 408-4335)

Replacement Components for Tool Number 767511-1

Slitting Tool Number 767527-1
(Instruction Sheet No. 408-4334)

Replacement Components for Tool Number 767527-1

Component Description	Quantity Required for Each Increment of 38 Positions (0.64 [.025] Centerline)	Part Number
Slitting Punch (Set of 35)	5	767532-1
Die Insert* (Set of 7)	1	767530-1

* The die insert is located in the tool with a 3.18 x 28.58 [.125 x 1.125] long dowel and held in place with a 6-32 UNC-2A x 7.94 [5/16] long socket head cap screw (not included with replacement insert).

Note: Part Numbers are RoHS compliant.

0.8mm Fine Stack and Fine Mate Connectors

Product Facts

- 0.8 [.031] fine pitch SMT connectors for board-to-board interconnections
- Low profile parallel board stacking heights as low as 3.0 [.118]
- Available packaged in tape and reel for automatic placement per EIAJ standards
- Offered with tin or gold plating on mating surfaces
- Solder pegs included for anti-peeling
- Surface areas provided to accommodate vacuum nozzles

Note: Fine Stack connectors are shown on top; Fine Mate connectors are shown at the bottom.

The TE 0.8mm Fine Stack and Fine Mate product lines are economical, surface-mount, fine pitch board-to-board connectors. Both product lines have been developed to meet the latest needs of the electronic industry for high density packaging.

These connectors offer a 0.8 [.031] contact pitch and parallel board stacking heights ranging from 3.0 [.118] to 4.5 [.177]. They are ideally suited for applications requiring miniaturization, such as cellular phones, pagers, notebook computers, camcorders and other consumer electronics.

Both Fine Stack and Fine Mate connectors were designed for economical, automatic placement onto SMT printed circuit boards. The plug and cap designs include surface areas to accommodate "pick and place" vacuum nozzles without secondary covers. All products are "tape and reel" packaged, conforming to EIAJ standards.

0.8mm Fine Stack Plugs, 0.8 [.031] Pitch

**3.0 – 9.0 [.118 – .354]
Stacking Height**

Material and Finish

Housing — 6T nylon, high heat resistant resin

Contacts — Phosphor bronze, plated gold or tin on contact area (see chart), tin or gold on solder leads (see chart), with entire contact underplated nickel

0.8mm Fine Mate Tabs, 0.8 [.031] Pitch

4.0 [.157] and 4.5 [.177] Stacking Heights

Material and Finish

Housing — 46 Nylon, high heat resistant resin

Contacts — Copper alloy, gold plating on contact area (see chart), tin on solder leads, with entire contact underplated nickel

Engineering Notes

0.8mm Free Height (FH) Connectors

Product Facts

- For parallel board stacking applications
- High density packaging on 0.8 [.031] centerline spacing
- Available sizes from 40 to 200 positions (in 20 position increments)
- Board stacking heights available from 5 [.197] to 16 [.630] (in 1 [.039] increments)
- Bellows type spring contacts are resistant to scooping and stubbing during mating and unmating
- Positioning bosses for proper on-board orientation
- Available packaged on "tape-and-reel" for automatic placement per EIA standards
- Recognized under the Component Program of Underwriter Laboratories Inc., File No. E28476

TE 0.8mm FH surface-mount connectors are designed for parallel board stacking applications using subminiature connectors to meet today's electronic industry requirements for high density packaging.

It is possible to save more than 50% of the required board space when compared to conventional 1.27 [.050] centerline connectors.

0.8mm FH connectors are ideally suited for application downsizing, such as notebook PCs, pen pads, cellular telephones and other electronic equipment requiring miniature connector packaging.

Vertical board-mount plugs and receptacles are available. By mating combinations of plug and receptacle housing heights, board-to-board stacking heights from 5 [.197] to 16 [.630] (in 1 [.039] increments) can be achieved.

The receptacles are preloaded with the TE unique bellows-type spring contacts for reliable electrical connection with the plugs.

In addition, right angle plugs are available which mate to standard receptacles.

Performance Characteristics

Voltage Rating — 100 VAC

Current Rating — 0.5 ampere

Contact Resistance — 30 milliohms max. (initial)

Dielectric Withstanding Voltage — 500 VAC (1 minute)

Operating Temperature — -40°C to +85°C (Including terminal temperature rise)

0.8mm Free Height Vertical Plugs, 0.8 [.031] Pitch (Continued)

**7mm Plugs for 7 [.276],
11 [.433] and 15 [.591]
Stacking Heights**

Material and Finish

Housing — High temperature thermo-plastic, natural color, 94V-0 rated

Contacts — Brass; duplex plated
0.00020 [.000008] min. gold on contact
area, 0.00100 [.000039] min. tin on sol-
der area, with entire contact underplated
0.00130 [.000051] min. nickel

0.8mm Free Height Right Angle Plugs, 0.8 [.031] Pitch

8mm Plugs for 5 [.197], 9 [.354] and 13 [.512] Stacking Heights

Material and Finish

Housing — High temperature thermo-plastic, natural color, 94V-0 rated

Contacts — Brass; duplex plated
0.00020 [.000008] min. gold on contact
area, 0.00100 [.000039] min. tin on sol-
der area, with entire contact underplated
0.00130 [.000051] min. nickel

1.0mm Free Height (FH) (IEEE 1386) Connectors

Product Facts

- For board stacking applications
- High density packaging on 1.0 [.039] centerline spacing
- Available in standard 64-position and optional 84-position sizes
- “Tape-and-reel” packaged per EIA standards
- Board stacking heights available from 8 [.315] to 15 [.591] (see page 84)
- Increased plastic clearance eliminates stress to solder joints during mating (see page 84)
- Improved locating posts ensure accurate hand or robotic placement (see page 84)
- Meets EIA-700 AAAB specifications for IEEE 1386 applications
- All 1.0mm Free Height products within this section are RoHS Compliant

Technical Documents (page 113)
Product Specification
108-2246

As a standard for adding local PCI or Sbus performance to Futurebus+ and VMEbus applications, IEEE 1386 offers new levels of performance and packaging convenience through the mezzanine architecture. TE makes it easier and more productive to add an IEEE 1386 mezzanine connector to your system. The surface-mount parallel stacking connector features contacts on a 1.0 [.039] pitch and is available in eight stacking heights from

8 [.315] to 15 [.591]. Sizes include the IEEE 1386 standard 64-position version and an optional 84-position version.

Not only is the connector compatible with EIA-700 AAAB — the connector standard for IEEE 1386 mezzanine connectors — it offers several enhancements that make it easier to use and more reliable. Increased plastic clearance between mating connectors makes it easier to align multiple connectors for mating,

thus eliminating stress to the solder joints during engagement. Improved locating posts allow fast, highly accurate hand placement of connectors. The connectors are available with vacuum covers for automated placement.

Performance Characteristics

Current Rating —

1.0 ampere per contact

Contact Resistance —

30 milliohms max. (initial)

Durability — tested to 100 mating cycles min.

1.0mm Free Height (FH) (IEEE 1386) Connectors (Continued)

Additional clearance during mating increases reliability by allowing registration misalignment and eliminating stresses on the solder joints.

Improved locating posts allow fast, accurate hand placement on the board by ensuring proper location at both the minimum and maximum dimensions of connector material tolerances and PC board hole tolerances.

AMPMODU 50/50 Grid Connectors

Product Facts

- Surface-mount products for parallel board-to-board applications, as well as right angle board-to-board and cable-to-board applications
- High density 1.27 x 1.27 [.050 x .050] centerline grid
- Three board-to-board stack heights: 6.35 [.250], 8.13 [.320] and 9.91 [.390]
- Non-protrusive metallic holddowns
- Reliable dual beam receptacle contacts for redundant contact
- Duplex plated receptacle and post contacts; gold plated on mating areas, tin-lead plated on tails
- Compatible with standard surface-mount processing (VPR and IR)
- Receptacle and header allow for drainage of processing fluids
- Tape and reel packaging available, contact TE for details
- Polarized header and receptacle assemblies
- Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association File No. LR7189

See Catalog 1307819 for additional AMPMODU product offerings.

AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed for parallel board-to-board stacking in high density applications.

Right angle board-to-board and cable-to-board applications are also possible, since the vertical receptacles also mate with non-latching right angle headers (page 95) and the vertical headers also mate with non-latching cable connectors.

Available are dual-row, vertical shrouded headers and receptacles in sizes ranging from 10 through 100 positions (in 10 position increments).

Parallel board-to-board stack heights of 6.35 [.250], 8.13 [.320] and 9.91 [.390] are achievable by selection of the appropriate header. The receptacle is the same for all three stack height headers.

Non-protrusive metallic holddowns are designed for use in 1.57 [.062] or thicker

PC boards and allow surface mounting to both sides of the board. In addition to providing retention during processing, the holddowns are soldered during reflow and therefore provide long term strain relief for the lead solder joints.

AMPMODU 50/50 Grid Vertical Headers and Receptacles are compatible with standard surface-mount processes; IR (infrared) and VPR (vapor phase reflow). The surface-mount connectors have been designed so that dimensioning, tolerances, referenced datums, hold-

down characteristics and packaging methods result in a system that is compatible with robotic assembly.

The headers and receptacles feature polarization to prevent misalignment.

Board-to-Board Right Angle Headers

Product Facts

- Surface-mount products for right angle board-to-board and cable-to-board applications
- Dual-row, right angle shrouded headers
- High density 1.27 x 1.27 [.050 x .050] centerline grid
- Latching and non-latching versions available
- Non-protrusive metallic holdowns
- Metallic tabs, when soldered to PC board pad, provide added mechanical support
- Duplex plated post contacts; gold plated on mating area, tin plated on tails
- Compatible with standard surface-mount processing (VPR and IR)
- Standoffs on header housings allow for drainage of processing fluids
- All headers are polarized
- Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association File No. LR7189 

AMPMODU 50/50 Grid Right Angle Headers will accommodate a variety of high density packaging applications; right angle board-to-board applications when mated with vertical receptacles (page 91) and right angle cable-to-board applications when mated with cable connectors (page 97). The small 1.27 x 1.27 [.050 x .050] centerline contact spacing allows efficient use of the PC board area.

Mechanical support of the headers to the PC board is provided by non-protrusive metallic holdowns designed for 1.57 [.062] or thicker PC boards. These holdowns are of the same

design as those used in the vertical headers (page 92) and receptacles (page 91). There are also metallic tabs that are soldered to the surfaces of the PC board pads for added support.

AMPMODU 50/50 Grid Right Angle Headers are available in dual-row, in either latching or non-latching versions, and in sizes ranging from 10 through 100 positions (in 10 position increments). The latching version provides positive retention when mated with the latching cable connector (page 97). All headers feature polarization to help prevent misalignment during mating.

See Catalog 1307819 for additional AMPMODU product offerings.

Cable-to-Board Connectors

Product Facts

- Dual-row receptacle connectors provide cable-to-board connection capabilities for vertical headers (non-latching) and right angle headers (latching and non-latching)
- IDC (Insulation Displacement Crimp) mass termination of solid or stranded round conductor 1.27 [.050] centerline ribbon cable with PVC or polyethylene insulation
- Accommodates ribbon cable conductor sizes of 28 AWG [0.08-0.09 mm²] and 30 AWG [0.05 mm²] and insulation diameters up to 0.91 [.036] maximum
- Reliable single beam receptacle contact design
- Duplex plated receptacle contacts; gold plated in mating area, bright tin-lead in termination area
- Terminating covers (sold separately) provide both strain relief and protection to the termination area
- Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions
- Connectors available with or without metal latch
- Connectors without latches are polarized to help prevent mismatching
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association File No. LR7189 

These dual-row cable connectors, with a 1.27 x 1.27 [.050 x .050] centerline contact spacing, provide cable-to-board connection capabilities for the AMPMODU 50/50 Grid Connector System. Cable connectors without a latch will mate with the vertical headers (page 92), while cable connectors with or without a latch can be used to mate with the right angle headers (page 95).

The cable connectors feature reliable single-beam IDC (insulation displacement crimp) contacts which are duplex plated with

0.00076 [.000030] gold. These contacts can be mass terminated to either solid or stranded round conductor ribbon cable with conductor sizes of 28 AWG [0.08-0.09 mm²] and 30 AWG [0.05 mm²] and a maximum insulation diameter of 0.91 [.036]. During termination, the terminating covers, which must be purchased separately, assist in guiding the wire into the IDC contacts, then provide strain relief when fully seated. Actual termination is accomplished with the TE manual tooling shown on page 99.

The latching version of the cable connector is equipped with a metal latch which provides positive retention of the receptacle cable connector when mated with a surface-mounted right angle header. The cable connector without a metal latch features polarization to help prevent mismatching. All connectors are available in sizes ranging from 10 through 100 positions (in 10 position increments).

See Catalog 1307819 for additional AMPMODU product offerings.

Application Tooling for Cable Connectors

The TE Manual Miniature Application Frame Assembly 91295-1, equipped with a Cover Closing Kit 543518-1, is used for the IDC termination of ribbon cable to the cable connectors shown on page 97.

Prior to termination, the covers must be partially assembled onto a connector housing, the cable inserted between the covers and contacts and the covers preclosed by hand, clamping the cable in place.

In the Manual Miniature Application Frame Assembly, the covers are fully seated to complete the mass termination and provide strain relief for the completed connection.

For tooling information, call Technical Support at the numbers listed below.

Manual Miniature Application Frame Assembly 91295-1
with Cover Closing Kit 543518-1

Note: Refer to TE Instruction Sheets 408-9817 (Frame Assembly 91295-1) and 408-9909 (Cover Closing Kit 543518-1) for complete termination/tooling information.

Engineering Notes

AMPMODU System 50 Connectors Surface-Mount Connectors, 1.27 [.050] Centers, Board-to-Board

Product Facts

- Surface-mount option for parallel board-to-board applications; completely intermateable with AMPMODU System 50 through-hole board-to-board and cable-to-board systems
- Dual-row, vertical, shrouded header and receptacle assemblies
- Available in select sizes from 10 through 100 positions
- High Density; contacts spaced on 1.27 x 2.54 [.050 x .100] centers; compact footprint
- Compatible with standard surface-mount processes
- Stand-offs for free drainage of flux cleaning solutions; visible solder joints for easy inspection
- Simple, low insertion-force hold-down for process retention and long-term strain relief for solder joints
- Available in tape and reel packaging for automatic placement
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476 
- Certified by Canadian Standards Association, File No. LR 7189 

The high-density surface-mount connector is another mounting option in the AMPMODU System 50 connector family.

This surface-mount system is totally intermateable with the AMPMODU System 50 thru-hole and cable-to-board connectors.

Additionally, the design of the mating interface has not been changed, ensuring the same high reliability as the thru-hole product.

The surface-mount system includes dual-row, vertical, shrouded header and receptacle assemblies in select sizes from 10 through 100 positions. It meets the tight dimensional requirements of surface-mount technology. The simple, low insertion-force hold-down provides both processing retention and long-term strain relief for the solder joints in the headers and receptacles.

See Catalog 1307819 for additional AMPMODU product offerings.

AMPMODU System 50 Connectors

Surface-Mount Connectors, 1.27 [.050] Centers, Board-to-Board (Continued)

The AMPMODU System 50 connector family includes a wide variety of high density, board-to-board (thru-hole and surface-mount) and cable-to-board connectors. System 50 connectors are composed of one- and two-row receptacles and posted headers with 1.27 x 2.54 [.050 x .100] spacing between contacts for extreme density and efficient use of printed circuit board area. Complete details on the AMPMODU System 50 connector family are presented in TE Catalog 1307819.

Performance Characteristics

Current Rating — 1.0 ampere per contact

Dielectric Withstanding Voltage —
500 VAC

Insulation Resistance —
5,000 megohms min.

Durability — Tested to 200 cycles

Mating Force — 1.38 N [5 oz] max.
per contact

Unmating Force — 0.22 N [0.8 oz]
min. per contact

Operating Temperature —
-65°C to +105°C

Surface-Mount Headers, 1.27 [.050] Centers, Board-to-Board

STAX LD Elastomeric Connectors Surface-Surface Compression Connection For Board Stacking Applications

Product Facts

- Single piece compression connector
- Contact pitch as low as 0.80mm
- Number of rows of Contacts: 1 through 5 (2 rows shown to the right)
- Number of contacts: 1 – 200
- Board Separation: 0.50 – 8.00mm
- Shielding Capability
- Performs in high speed applications (3 GHz)
- Low Resistance
- Current Capability: 1 Amp typical with higher capability possible with modification
- Easily modified standard designs
- Facilitates automatic assembly, rework, and field upgrades
- Compatible with tin and flash gold contact metallurgy
- Rugged and reliable
- RoHS compliant

Modifications and Options

The flexible elastomeric manufacturing process allows a fast, easy modification of the products to suit the individual needs of the application. Typically with an elastomer-only solution there is no tooling. There are requirements for minimum production volume.

Dual-Row STAX Connector connects two rows of contact pads. Retention slot is provided in PCB separator.

Elastomeric Connectors are viable in most applications where traditional board-to-board connectors are used. The applications may include high speed, power, digital, grounding/shielded interconnect.

The elastomer is a single piece compression technology. The silicone within the connector provides the normal force (spring). The conductive layers (blend of silicone and silver particles) make redundant electrical contact to the pads on the board.

The STAX LD technology is based upon 30 years of experience in manufacturing and in the hundreds of millions of connectors used in trouble-free applications. This is a low durometer and low contact resistance product.

TE maintains complete control over the quality and performance of the product. The STAX product line is manufactured from basic raw materials (silver or gold, and silicone) using a proprietary manufacturing process.

The result is a connector technology that allows the freedom of design without the traditional limitations of standard product availability. There is no need to compromise the end product at the design stage.

Mechanically, the elastomeric capabilities are flexible. The technology can meet PCB area requirements in applications of board separations under 8.00mm. Electrically, resistance and current ratings are competitive with most alternative technologies.

Introduction — STAX LD Elastomeric Connectors

How STAX elastomeric connectors work

STAX elastomers are zero insertion force connectors that do not require soldering. They provide a compliant surface-to-surface compression connection when deflected between opposing mirror-image pad patterns. STAX elastomers are composed of alternating layers of conductive and non-conductive silicone rubber. Silicone rubber is the base material because it has excellent aging properties, chemical stability, electrical reliability, and superior performance in shock and vibration. It also provides a gasket-like seal to protect the contact surfaces.

The conductive layers consist of tiny metallic particles dispersed in silicone rubber. Within each of the conductive layers, the metallic particles create thousands of conductive paths. Therefore, each conductive layer provides multiple points of contact at the sub-

strate interface. While the conductive layers ensure contact between mating pads, the non-conductive layers isolate the conductive layers from each other. The alternating STAX construction – 200 conductive layers per inch (8 per mm) – allows multiple conductive layers to make contact to a single contact pad while the non-conductive layers electrically isolate adjacent contact pads.

The advantage of this material construction is that you achieve 3-4 conductive layers typically making contact to a single contact pad on the board. Also, a single elastomeric strip (element) is used to connect an entire row of contacts. The multiple layers coupled with the thousands of conductive paths in each layer ensure reliable interconnect.

Why use a TE Elastomeric connector:

1. Simple Implementation

Assembly is as easy as making a sandwich. There is no soldering, no special tooling or machinery.

2. Easily modified

How often is a standard off-the-shelf connector ideal for your application? Smaller height, higher I/O, greater current capacity, lower resistance, less PCB area are all modifications that can be made.

3. Fast

The flexible elastomeric manufacturing process allows quick turn on prototypes (1 week) to test solutions and rapid ramp on production. Prototypes are made with the same process as production.

4. No tooling

An elastomer-only approach allows the customer to implement the housing and alignment features within existing plastic or metal structure. Modifications of elastomer length, height, and width do not require tooling.

5. Reliability

TE's elastomeric products have been tested to the following:

- MIL STD-1344
- IEC-68-2
- EIA-364
- MIL-STD 202
- JIS C 0020
- JEIDA 38
- INTEL SPEC 5.1, 5.2
- NUMEROUS CUSTOMER ACCELERATED LIFE TESTING (ALT)

Test data available upon request.

6. Product Support

TE product engineers work directly with customer engineering teams on modifications and custom solutions for volume applications. All aspects of the design and implementation of the product are reviewed to ensure a successful product launch.

Introduction — STAX LD Elastomeric Connectors (Continued)

Custom Capability:

Application requirements vary dramatically across the many industries that elastomers are used. The technology is flexible in adapting to many of these requirements but, as with any product, there are limits.

1. Determine if an elastomeric connector is appropriate for the application.

- a. *Board-to-Board separation > 8mm?* An elastomer cost is tied closely to material usage (precious metals). In application greater than 8mm elastomers lose their price competitiveness.
- b. *X-Y alignment (> ±0.25mm)?* Unlike a mechanical male-female connector an elastomer cannot perform the alignment of the system. The reference drawings show how pins can provide satisfactory alignment. Other methods can achieve the same result.
- c. *Sliding contact?* Silicone by the nature of the product has a high coefficient of friction. Sliding a contacting surface across the elastomer will not be reliable.
- d. *Contact Pitch: < 0.80mm?* Since an elastomeric connector depends on the alignment of the mating surfaces by an external means, contact pitch < 0.80 mm is not easily achievable. However,

board real-estate is minimized by achieving more closely-spaced rows of contacts pads than fine-pitch connectors.

2. Determine if “holder” functions can be integrated within existing structure?

The holder is synonymous with the plastic that surrounds traditional mechanical connectors. The most efficient and cost effective way to implement a STAX connector is by incorporating a retaining slot into an existing housing or board separator as shown on the reference designs.

In an approved application, Elastomer Technologies application engineers are available to assist in:

- Defining customer furnished housing requirements.
- Providing design input for:
 - Alignment
 - Deflection
 - Pad Layout
 - Final Elastomer Dimensions

3. Can TE supply a complete connector solution?

Yes. These solutions can take the form of simple holders with STAX connectors held in place by:

- Localized Interference
- In-molding
- Grafting

The holder or frame can be plastic, silicone rubber, or metal and typically has low tooling investment.

Below are examples of complete connection solutions in challenging applications.

Circular Connector Grafted 160-Position (LCP frame)

Ultra-low Profile Inmolded 8-Position 0.5mm Height Silicone Rubber Base

Module-to-Board Grafted 220-Position Peripheral Contact Ultem Frame

ULTEM is a trademark of General Electric Company.

STAX LD Connector Properties

Part Number 2-1442001-0 Generic STAX LD Connector Sample

Physical Properties

Height — 0.50 – 8.00 [.020 – .315]
Minimum Pad Pitch — 0.80 [.031]
Conductor Width — 0.064 [.0025]
Conductor Pitch — 0.127 [.005]
Typical Clamping Force —
 See Chart

STAX LD - FORCE AND RESISTANCE vs. DEFLECTION

Values are based on a STAX LD connector 2.90 [.114] high, 26.42 [1.040] long, with a conductor width of 1.19 [.047]. Contact to gold pads 0.50 [.020] wide on 1.00 [.039] centers.

Note: Lower deflection forces can be obtained with thinner width of STAX strip.

Typical Electrical Properties

Contact Resistance¹ — 35mΩ
Dielectric Constant — 3.1
Insulation Resistance¹ —
 10¹² Ω min.
Dielectric Withstanding Voltage¹ —
 1000 Volts without breakdown or arcing
Current Carrying Capacity¹ — 1 A
¹ Test elastomer — 1.00 [.039] wide x
 2.9 [.114] tall.
 Test boards — Au plated contact pads
 0.50 [.020] wide on 1.00 [.039] pitch.

Environmental Parameters

Operating Temperature —
 -40°C to +125°C
Moisture — 0 to 100% RH

* Other pad layouts are possible with these connectors. Consult TE's Application Engineering Department for the ETI product line at ETIapplicationsEng@te.com

Note: Part Numbers are RoHS compliant.

Engineering Notes

Technical Documents

Various technical documents are available for your use.

Product Specifications describe technical performance characteristics and verification tests. They are intended for Design, Component and Quality Engineers.

0.4mm Fine Stack Connectors — Pages 7-11:

108-5901 0.4mm Fine Stack Connectors

0.5mm Fine Stack and Fine Mate Connectors — Pages 13-18:

108-5425 0.5mm Fine Mate Receptacles and Tabs

108-5546 0.5mm Fine Stack Receptacles and Tabs

0.5mm Free Height (FH) Connectors — Pages 19-25:

108-5560 0.5mm Free Height (FH) Connectors

0.6mm Free Height (FH) and GIGA Connectors — Pages 27-40:

108-5468 0.6mm Free Height (FH) and GIGA Connectors

0.64mm MICTOR Connectors — Pages 41-62:

108-1422 0.64mm MICTOR Connectors

0.8mm Fine Stack and Fine Mate Connectors — Pages 63-69:

108-5424 0.8mm Fine Stack Connectors (Tin-Lead Contacts)

108-5466 0.8mm Fine Stack Connectors (Gold Contacts)

108-5512 0.8mm Fine Mate Connectors

0.8mm Free Height (FH) Connectors — Pages 71-82:

108-5390 0.8mm Free Height (FH) Connectors

1.0mm Free Height (FH) Connectors (IEEE 1386) — Pages 83-88:

108-2246 1.0mm Free Height (FH) Plug and Receptacle Connectors Using Surface Mount Technology

AMPMODU 50/50 Grid Connectors — Pages 89-99:

108-1332 Vertical Board-to-Board Connectors, AMPMODU 50/50 Grid

AMPMODU System 50 Connectors — Pages 101-104:

108-1093 Board-to-Board Connectors, AMPMODU System 50

108-1109 Receptacle Connectors, AMP-LATCH System 50

108-16022 Connector, FFC Cable, 1.27 [.050] Centerline

Application Specifications describe requirements for using the product in its intended application and/or crimping information. They are intended for Packaging and Design Engineers and the Setup Person.

0.64 mm MICTOR Connectors — Pages 41-62:

114-11004 MICTOR Connector System

1.0mm Free Height (FH) Connectors (IEEE 1386) — Pages 83-88:

114-25045 1.0mm Free Height (FH) Plug and Receptacle Connectors Using Surface Mount Technology

AMPMODU 50/50 Grid Connectors — Pages 89-99:

114-7010 AMPMODU 50/50 Grid Connector System

AMPMODU System 50 Connectors — Pages 101-104:

114-16008 Flexible Flat Cable (FFC) Connectors for 1.27 [.050] Centerline Cable

114-25029 AMPMODU System 50 Ribbon Cable Receptacle Connectors

114-25035 Surface-Mount Connectors, AMPMODU System 50

Engineering Notes

Other Fine Pitch Connectors

MICTOR and Micro-Strip Connectors

MICTOR Connectors:

- 0.64 [.025] contact pitch
- 76 dedicated signal lines per linear inch
- 38 to 266 signal positions (in 38 position increments)
- Right angle versions are available

Micro-Strip Connectors:

- 1.27 x 2.54 [.050 x .100] contact centerline
- 40 high speed signal lines per inch
- Custom stacking heights available
- 40 to 240 positions

For more details, see TE Catalog 65194.

CHAMP 0.8mm High Density Connectors

- 0.8 [.031] contact pitch
- EMI shielded, high density, low profile I/O system
- Insulation displacement type (IDC) contacts
- PC board receptacles feature surface-mount and thru-hole hybrid board leads
- Right angle PC board connectors are offered in 50, 68 and 90 position receptacles, and 50 and 68 position plugs
- Cable plugs are available in 50 and 68 position sizes

For more details, see TE Catalog 65972.

1.25mm F-P Board-to-Board Connectors

- 1.25 [.049] contact pitch
- Economical board-to-board interconnection connector of ultra-lightweight and ultra-thin construction
- Tube and reel-mounted products for automatic board packaging; loose-piece connectors also available
- Single-row and dual-row versions available, both enabling either parallel or right angle interconnection of boards using vertical post header and either vertical or horizontal receptacle header
- 4 to 30 positions

For more details, see TE Catalog 124962.

Other Fine Pitch Connectors (Continued)

AMPSLIM Wire-to-Board Connectors

- 1.25 [.049] contact pitch
- Low profile, compact construction; above-board heights of 1.3 [.051] with offset-mount type and 1.85 [.073] with horizontal-mount type
- 7.3 [.287] mating length
- Receptacle contacts on board mounting side; tab contacts on wire mount side
- Design eliminates pin damage problems
- Low cost tin-plated contacts ensure low insertion force and high reliability

For more details, see TE Catalog 124917.

AMP Super Trap Flat Ribbon Cable Connectors

- 1.25 [.049] contact pitch
- Terminates 0.12-0.15mm² [26 AWG] ribbon cable to PC board
- Available in both vertical and horizontal mounting types
- Low above-board height for high density packaging
- Radial tape-mounted connector as staggered posted product; applicable to high-speed automatic packaging
- Loose piece connector features post with kink for retaining connector when mounted to PC board

For more details, see TE Catalog 124962.

AMP Micro-MaTch Miniature Connectors

- 1.27 [.050] contact pitch
- 5.0 [.197] wide, 7.0 [.276] height of mated connectors
- Suitable for mass termination of 0.08-0.09mm² [28 AWG] ribbon cable
- Contacts fully protected by plastic housings
- Board connectors supplied on tape. For automated connector handling, consult TE at the numbers listed below
- Built-in polarization
- Full range of application tooling available
- 4 to 20 positions

For more details, see TE Catalog 82750.

Other Fine Pitch Connectors (Continued)

AMPMODU 50/50 Grid Connectors

- 1.27 x 1.27 [.050 x .050] centerline
- Surface-mount products for parallel board-to-board, right angle board-to-board and cable-to-board applications
- Compatible with standard surface-mount processing
- Polarized headers and receptacles
- Cable-to-board connectors feature Insulation Displacement Crimp (IDC) mass termination of solid or stranded round conductor ribbon cable
- 10 to 100 positions

For more details, see TE Catalog 82643.

AMPMODU System 50 Connectors

- 1.27 x 2.54 [.050 x .100] centerline
- Connectors for parallel board-to-board, right angle board-to-board and cable-to-board applications
- Board-to-board connectors for thru-hole and surface mounting
- Cable-to-board connectors terminate 0.05mm² [30 AWG] solid and 0.03mm² [32 AWG] stranded ribbon cable with conductors on 0.64 [.025] centers
- Selected sizes from 10 to 100 positions

For more details, see TE Catalog 1307819.

Low Profile System (LPS)

- 1.27 [.050] and 2.00 [.079] centerlines
- Ultra-low profile
- Proven four-point contact technology
- Seamless receptacle contact for reliability and consistency
- Surface-mount versions for use with multilayer and flexible film circuit boards
- EIA 481 tape-and-reel packaging
- Robotics capability for vacuum or mechanical pick-and-place

For more details, see TE Catalog 124140.
