

RollPilot Mini

Measuring wheel

This reliable roller distance measuring device is designed for use in straight lines and curves. The measuring wheel is accurate to the nearest centimetre up to 9,999.9 metres. Measured values are shown on the easy-to-read display. Direct measurements can be taken from wall to wall due to the device's compact design. A movable indicator provides information on the exact start and final position. Rolling the wheel forwards adds to the measured values while rolling it backwards subtracts. Easy to transport due to the telescopic handle and folding stand.

- Measuring wheel for use in straight lines and curves
- Accurate measurements up to 9,999.9 m
- Compact design for direct measurement from wall to wall
- Precise start and end position with moving pointer
- Pull-out design for easy transport
- Mechanical metering wheel with 0.5-metre circumference
- Non-wearing direct drive
- Folding stand

TECHNICAL DATA

Accuracy	± 0.1%
Range	0 - 9,999.9 m
Measuring Wheel Radius	79.5 mm
Measuring Wheel Circumference	500 mm
Units	m
Operating Conditions	-20°C ... 80°C, max. humidity 80% rH, no condensation, max. working altitude 4000 m above sea level
Dimensions (W x H x D)	159 mm x 1100 mm x 124 mm
Weight	550 g (without accessories)

SCOPE OF DELIVERY
