Mouse Live Trap, Set of 2

The humane way to catch rodents

Mouse traps do not necessarily need to kill rodents: It's also possible to catch them alive – by using the Gardigo Mouse Live Trap.

The trap is optimized for solid baits. Stick a piece of cheese or bacon onto the bait skewer, set the traps on the pathways that mice frequent (usually alongside walls) and tension them. When a mouse pulls on the bait, the door snaps shut and the rodent is caught.

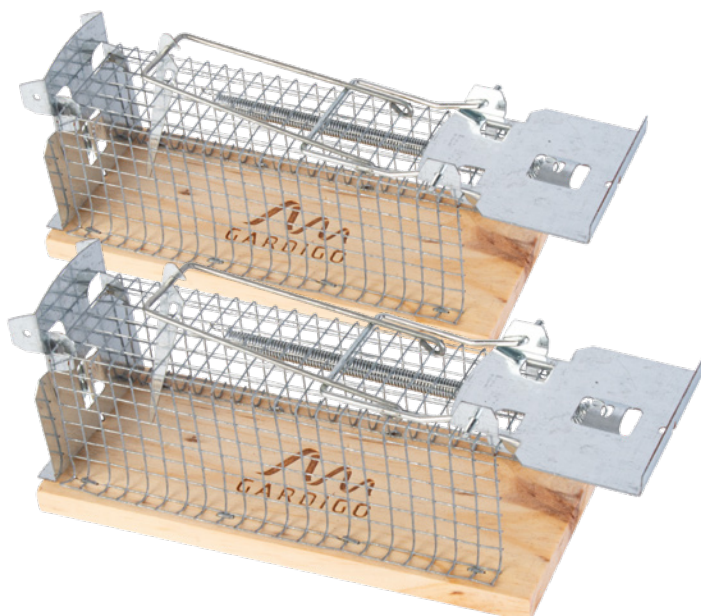

Please make sure to check the traps regularly and set caught animals free in 2 km distance or more.

Also available individually (Art.-No. 62351).
