The Lamina textile

In collaboration with Gabriel, Europe's leading supplier of furniture textiles, we have developed stylish fabric fronts in their unique Lamina textile, giving the Front design an extra dimension.

The fabric fronts in laminated screen fabric add a dynamic and fresh expression, bringing a new and unconventional dimension to your heat pump. The Lamina textile features a modern and remarkable graphic grid design that beautifully complements a subtle heathered effect.

Future-proof fabric

Our collaboration with Gabriel emphasizes the vision of creating an entirely new look for heat pumps. Gabriel provides high-quality, design-focused, and sustainable textiles with a focus on recycling. Lamina is a robust fabric made of 100% polyester, making it a monomaterial and possible to recycle in the future.

Care & maintenance

Wipe with a damp cloth.

Regular gentle vacuum cleaning helps to preserve the fabric's attractive colour and appearance.
