

Silent Self Closing Sleeve (bulk stock) Black

The thin line is FET monofilament.

The thick line consists of two cotton threads.

The low-noise, self-closing sleeve is made from single-threaded and bundled polyester braid with woven-in cotton threads and is characterized by excellent noise damping, abrasion resistance and flexibility. The self-closing design allows easy bundling of cables and conduits without the need to disconnect connectors. To protect cables and hoses from abrasion and to reduce operating noise, this protective conduit is a very good choice! Resistant to gasoline, engine chemicals and heat.

To prevent fraying, the sleeve should be cut with a hot cutting tool!

Technical data: Material: polyester braid with cotton threads • Overlap: $\geq 25\%$ • Temperature range: $-40 \dots 150\text{ }^{\circ}\text{C}$ • Wall thickness $1.8 \pm 0.2\text{ mm}$ • Color: black • RoHS & REACH compliant • Flammability based on UL94-V1.
